This book addresses the issues confronting educators in the integration of digital technologies into their teaching and their students’ learning. Such issues include a skepticism of the added value of technology to educational learning outcomes, the perception of the requirement to keep up with the fast pace of technological innovation, a lack of knowledge of affordable educational digital tools and a lack of understanding of pedagogical strategies to embrace digital technologies in their teaching. This book presents theoretical perspectives of learning and teaching today’s digital students with technology and propose a pragmatic and sustainable framework for teachers’ professional learning to embed digital technologies into their repertoire of teaching strategies in a systematic, coherent and comfortable manner so that technology integration becomes an almost effortless pedagogy in their day-to-day teaching. The materials in this book are comprised of original and innovative contributions, including empirical data, to existing scholarship in this field. Examples of pedagogical possibilities that are both new and currently practised across a range of teaching contexts are featured.

Foundations of Marketing, Fourth Edition, is a fully revised and updated edition of the highly successful text by John Fahy and David Jobber. Devised to offer comprehensive coverage for a short course in marketing, Foundations of Marketing retains its concise twelve chapter structure. The book offers a rigorous but accessible introduction, covering the core marketing curriculum in an engaging style that routinely demonstrates how marketing affects our everyday lives, considering both the decisions we make as consumers, and decisions marketing professionals would make in response to their customers. Fully revised and updated, this edition offers a closer focus on the value of marketing and its impact. The new edition also takes a more critical approach that questions and engages with current debates. Topic highlights of the fourth edition include widespread coverage of the huge impact of social media on the sphere of marketing, a fresh look at new techniques of marketing research used in real organizations, and a contemporary perspective on the growing service segment of the world economy. Bang up to date with new cases and examples, the book covers European examples from all corners of the region, including Germany, Sweden, Denmark, France, Switzerland, the UK and Ireland, without ignoring the prevalence of US and global brands in contemporary culture. The book retains the popular Marketing Spotlight and Marketing in Action features, showcasing brands as diverse as Lady Gaga, Guinness and Gap. New Social Media boxes cover LinkedIn, Facebook, Groupon and more. The fourth edition's case studies are all new, featuring brands from varying segments and countries, including H and M, Subway, Carlsberg, Rolex and Jamie Oliver. The new edition is supported by a superlative resource package to support lecturers and students, with exciting new videos linked to the case material, case and tutorial support and the integration of McGraw-Hill's Connect learning solution. Connect offers gradeable interactive activities, cases, self study quizzes, and a variety of tools to help students to master their marketing module.

Apple's exciting new Mastered for iTunes (MFIT) initiative, introduced in early 2012, introduces new possibilities for delivering high-quality audio. For the first time, record labels and program producers are encouraged to deliver audio materials to iTunes in a high resolution format, which can produce better-sounding masters. In iTunes Music, author and world-class mastering engineer Bob Katz starts out with the basics, surveys the recent past, and brings you quickly up to the present—where the current state of digital audio is bleak. Katz explains the evolution of standards for dynamic range through the present and with implications for the future. He details the new methods that Apple is developing to accept high resolution audio and shows step by step how audio engineers and producers can take advantage of them. This book is designed for all those dealing with sound, from sound engineers to music industry executives and musicians—and those aspiring to all these roles. This book will help you understand the issues around delivering high-quality environment and get all your facts straight for when you encounter resistance to good sound. Topics covered include:

- Contrasting the production of CD albums with iTunes albums
- High Resolution audio
- Dithering
- Distortion (and how to avoid it)
- Lossy Coding
- Loudness Metering
- Sound Check and how it affects our production techniques
