The year is 2144...and the battle over Earth's precious resources has raged for a century. With global economies in ruins and all-out world war more than a possibility, the U.S government turned to the Union Aerospace Corporation, giving it carte blanche on the legendary red planet of Mars in a desperate bid to construct an off-world outpost that might provide resources, a military advantage...as well as something so secret that even members of government don't have a clue about it.... Special Ops Marine Lieutenant John Kane was once a careerist simply glad to have a job, and couldn't care less about politics just as long as Uncle Sam's check cleared. But that was before he listened to his conscience and disobeyed a direct order. Busted down to private, Kane has been reassigned to the "U.S. Space Marines" -- the private army of the UAC -- with the prospect of becoming little more than a glorified security guard on Mars.... Now Lt. Kane's fate leads him to Mars City -- part environmental community, part lab center, and all owned and protected by the UAC. It's a strange world with a fatal environment, and the thousands who live and work within the city have already begun to think of themselves as Martians. And away from Mars City, at the strange ancient sites uncovered on the planet, a

Principles of Interactive Multimedia Citadel Press

Principles of Interactive Multimedia introduces all the contributory fields that are necessary for informed, thoughtful design and development of multimedia systems to be delivered through CD, the web or other mechanisms. It adopts

an inter-disciplinary approach. The focus is to explain the basics of all the contributing disciplines to the design of systems. The book equips readers to think about multimedia issues, at the same time as they are learning and applying skills. It will encourage development, innovation and creative operation using the tools of multimedia. Multimedia workers operate in teams with differing skills, and this book will give each member of the team an understanding of the skills of the rest of the team and hence a means of communicating with them effectively. It is closely related to the needs of practice and the real world, while being leading edge in what it proposes. Written by an Author with many years' | |'" experience as lecturer and practitioner in multimedia applications, the book focuses on the underpinning models behind multimedia. Hitherto, practice has been to teach the material primarily as skill-based, with comparatively

---

little theory of any sort, and no integrated theory at all. The subject is now reaching the level of maturity where such theory is being recognised as essential to the provision of adequate courses as an academic discipline. The book provides this integrated theoretical base by focussing on interaction as the key to system design, and particularly by using linguistic models to underpin a communication interpretation of multimedia. This unification is unique, but has been used with students over several years and is well received by those from both science and arts backgrounds. It has been positively received by other academics who have seen it.

Moments of Grace Routledge  
Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male

protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-

transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
