Many people
modify their
Harley-Davidson
engines--and find
the results
disappointing.
What they might
not know--and
what this book
teaches--is that
emphasizing
horsepower over
torque, the usual
approach, makes
for a difficult ride.
Author Bill Rook
has spent decades
perfecting the art

of building torque-
monster V-twin
Harley engines.
Here he brings
that experience to
bear, guiding
motorcycle
enthusiasts
through the
modifications that
make a bike not
just fast but
comfortable to
ride. With clear,
step-by-step
instructions, his
book shows
readers how to get
high performance
out of their
Harleys--and enjoy
them, too.

This book
analyses the
Association of
Southeast Asian
Nations (ASEAN)
as a powerful
actor in
International
Relations by
examining how
the ASEAN
community has
evolved, looking
specifically at its

relationship with
the EU with
regards to human
rights. The book
adds to important
contemporary
debates within
constructivist
theory, shedding
light on the need
for 'critical'
constructivism
that emphasises
language and
contestation and
what that may
entail. On an
empirical level, it
challenges the
idea of an 'EU-
centrism,'
demonstrating
how ASEAN is
the major driving
force behind its
human rights and
community
aspirations, as
well as within the
ASEAN-EU
relationship.
Furthermore, this
book engages

with the
introspection
surrounding
constructivism by
addressing the
trouble with
'norms,' and
instead unpacking
the relationship
between ASEAN
and the EU to
show language
power in play. In
particular, the
book looks at how
language, or
rather coercive
language, helps us
'see' contestation
in action,
something that
researchers
sympathetic
towards the idea
of ASEAN's
'resistance' have
been unable to
show through a
focus on norms.
Tracing the
evolution of the
ASEAN
community and

human rights aspirations in a new light, showing how exactly the EU remains an inspiration, but not a model, and more interestingly how ASEAN demonstrates power in the relationship, the book will be of interest to academics working on Asian Studies, European Studies, International Relations Theory and human rights. When anyone thinks of motorcycling, whether they are

enthusiasts or only casually interested, the name Harley-Davidson immediately comes to mind. Harley-Davidson is among the oldest surviving motorcycle manufacturers; the company began in 1903 and continues to this day. As you can imagine, over the course of more than 100 years, the company has seen prosperous times as well as lean times, changes in focus and direction, evolution and revolution. All of that leads to a lot of company history and trivia. American Iron Magazine associate editor

Tyler Greenblatt has compiled 1,001 Harley-Davidson facts into this single volume, with subjects ranging from the historic powertrains to pop culture to Harley-Davidson as a company and manufacturer. Facts begin with the early years, when a motorcycle was not much more than a bicycle with an engine attached, to the war efforts of World War I, when 15,000 were put into service. During the 1920s, Harley-Davidson grew into the largest manufacturer in the world, and that momentum helped carry it

through the Great Depression and into World War II. Postwar development and AMF ownership are also covered in detail, as well as the restructuring and revival of the brand in recent years. Whether you're a casual rider, racer, or restorer, Harley-Davidson enthusiasts will be sure to find something in this book for that next conversation with fellow hobbyists. This book will keep Harley-Davidson enthusiasts entertained for hours, and is a great edition to any motorcycling library. p.p1 {margin: 0.0px

MARCH 1999 Causey Enterprises, LLC Billy Lane is the fastest-rising star among the high-profile custom chopper builders, and in this book he offers many of his secrets for building a chopper that will stand out in a crowd. This is the ultimate resource for any chopper builder-a book designed as a step-by-step guide to building any type of custom motorcycle. This book also covers custom-building beyond the

chopper genre, including the building of "bobbers," an old-school style of custom that has been revived as a hot trend. Predating choppers, they are on the cutting edge of current biker "cool", for real riding, and are much safer and more functional than choppers. Billy Lane has been featured several times on the Discovery Channel's top rated series Biker Build-Off and the Monster Garage premiere episode.
