Goodbye Unicorns Harlequin We commonly think of marriage as a private matter between two people, a personal expression of love

and commitment. In this pioneering history, Nancy F. Cott demonstrates that marriage is and always has been a public institution. From the founding of the United States to the present day, imperatives about the necessity of marriage and its proper form have been deeply embedded in national policy, law, and political rhetoric. Legislators and judges have envisioned and enforced their preferred model of consensual, lifelong monogamy--a model derived from Christian tenets and the English common law that posits the husband as provider

and the wife as dependent. In early confrontations with Native Americans, emancipated slaves, Mormon polygamists, and immigrant spouses, through the invention of the New Deal, federal income tax, and welfare programs, the federal government consistently influenced the shape of marriages. And even the immense social and legal changes of the last third of the twentieth century have not unraveled official reliance on marriage as a "pillar of the state." By excluding some kinds of marriages and encouraging

---

others, marital policies have helped to sculpt the nation's citizenry, as well as its moral and social standards, and have directly affected national understandings of gender roles and racial difference. Public Vows is a panoramic view of marriage's political history, revealing the national government's profound role in our most private of choices. No one who reads this book will think of marriage in the same way again. *Dream Groom* Harlequin The Aspen Policy Books present innovative thinking on

America's most pressing national security challenges. *Securing Cyberspace: A New Domain for National Security* is a collection of papers commissioned for the 2011 Aspen Strategy Group workshop, a bipartisan meeting of top national security experts. The papers examine the complexities of the emerging cyber threat, as well as

the possibilities—and inherent challenges—of crafting effective domestic and international cyber policy. Authors explore topics such as the economic impact of cybercrime, cyber as a new dimension of warfare, the revolutionary potential of Internet freedom, and the future realities the United States will face in the new age of heightened

What does a gal have to do to get a good date in this town? Adele Harris can't even begin to answer that question. She's had so many lousy dates that she's sure she's cursed. Why else would every man she goes out with suddenly act like he's lost his mind—and his manners? Adele thought life couldn't get any more confusing . . . until she learns the marriage of her seemingly Miss Perfect sister is on the rocks. So she goes back to their hometown to give her a shoulder to cry on, only to run smack into Zach Zemaitis . . . the one who got away. Texans love God, family, and football, though not always in that order. Zach, a former pro star, knows all about football. As for the other two, well, he's doing his best. But when Adele comes charging back into his life—still all lush curves and beautiful, big blue eyes—he wonders if his best is good enough. After all, he did her wrong. Can a woman with her track record ever really believe that he's serious this time . . . or is he destined to

After all that time, the people left behind moved on, or tried to. Until today. Today five of those kids return. They're sixteen, and

they are . . . fine. Scarlett comes home and finds a mom she barely recognizes, and doesn't really recognize the person she's supposed to be, either. But she thinks she remembers Lucas. Lucas remembers Scarlett, too, except they're entirely unable to recall where they've been or what

happened to them. Neither of them remember the sixth victim, Max--the only one who hasn't come back. Which leaves Max's sister, Avery, wanting answers. She wants to find her brother--dead or alive--and isn't buying this whole memory-loss story. But as details of the disappearance
