percent of irrigation budgets going for major and medium projects (Thakkar, 1999). Large scale irrigation is synonymous with canal irrigation in India and canal irrigation is a costly proposition, more so when provided under the aegis of grave inefficiencies in project implementation and canal operation (Dhawan, 1997). Punjab is a granary state

irrigation.punjab.gov.in

Punjab, located in the north west of India, is one of the smallest yet one of the most prosperous states of India. Its name is derived from the Persian words, Punj (five) and ab (water) was a land of five rivers which formed part of Indus Basin till 1947.

Government of Punjab, India

Irrigation in India includes a network of major and minor canals from Indian rivers, groundwater well based systems, tanks, and other rainwater harvesting projects for agricultural activities. Of these groundwater system is the largest. In 2013-14, only about 36.7% of total agricultural land in India was reliably irrigated, and remaining 2/3rd cultivated land in India is dependent on monsoons.
