U.S. health care is a \$2.5 trillion system that accounts for more than 17 percent of the nation's GDP. It is also highly susceptible to fraud. Estimates vary, but some observers believe that as much as 10 percent of all medical billing involves some type of fraud. In 2009, New York's Medicaid fraud office recovered \$283 million and obtained 148 criminal convictions. In July 2010, the U.S. Justice Department charged nearly 100 patients, doctors, and health care executives in five states of bilking the Medicare system out of more than \$251 million through false claims for services that

were medically unnecessary or never provided. These cases only hint at the scope of the problem. In *Phantom Billing, Fake Prescriptions, and the High Cost of Medicine*, Terry L. Leap takes on medical fraud and its economic, psychological, and social costs. Illustrated throughout with dozens of specific and often fascinating cases, this book covers a wide variety of crimes: kickbacks, illicit referrals, overcharging and double billing, upcoding, unbundling, rent-a-patient and pill-mill schemes, insurance scams, short-pilling, off-label marketing of pharmaceuticals, and rebate fraud, as well as criminal acts that enable this fraud (mail and wire fraud, conspiracy, and money

laundering). After assessing the effectiveness of the federal laws designed to fight health care fraud and abuse—the antikickback statute, the Stark Law, the False Claims Act, HIPAA, and the food and drug laws—Leap suggests a number of ways that health care providers, consumers, insurers, and federal and state officials can bring health care fraud and abuse under control, thereby reducing the overall cost of medical care in America.

This book explores the development of the fur trade in Chesapeake Bay during the seventeenth century, and the wide-ranging links that were formed in a new and extensive transatlantic chain of supply and consumption. It considers changing fashion in England, the growing demand for fur, at a time when the Russian fur trade was in decline, examines native North Americans and their trading and other exchanges with colonists, and explores the nature of colonial society, including the commercial ambitions of a varied range of investors. As such, it outlines the

intense rivalry which existed between different colonies and colonial interests. Although the book argues that fur never supplanted tobacco as the region's principal export, noting that the trade declined as new, more profitable sources of supply were opened up, nevertheless the case of the Chesapeake fur trade provides an excellent example of how different elements in a new transatlantic enterprise fitted together and had a profound impact on each other.

"[This book is] the most authoritative assessment of the advantages and disadvantages of recent trends

toward the commercialization of health care," says Robert Pear of The New York Times. This major study by the Institute of Medicine examines virtually all aspects of for-profit health care in the United States, including the quality and availability of health care, the cost of medical care, access to financial capital, implications for education and research, and the fiduciary role of the physician. In addition to the report, the book contains 15 papers by experts in the field of for-profit health care covering a broad range of topicsâ€"from trends in the growth of major investor-owned hospital companies to the ethical issues in for-profit health care. "The report makes a lasting contribution to the health policy literature." â€"Journal of Health Politics, Policy and Law.

All the names are here, from Ronald Ryan (the last man hanged in Australia), to the Carlton Crew. An unmissable book, in one handy volume, for anyone who wants to know all there is to know about Australia's

dark underbelly.

Report of the Interagency Scientific Committee to Address the Conservation of the Northern Spotted Owl Cornell University Press

Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this practical analysis of sports law in Australia deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-

regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph

fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Australia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

The Changing Hospital Industry Oxford University Press

In recent years, the hospital industry has been undergoing massive change and reorganization

with technological innovations and the spread of managed care. As a result, the total number of hospitals countrywide has been declining, and a growing number of not-for-profit hospitals have converted to for-profit status. These changes raise two fundamental questions: What determines a hospital's choice of for-profit or not-for-profit organizational form? And how does that form affect patients and society? This timely volume provides a factual basis for discussing for-profit versus not-for-profit ownership of hospitals and gives a first look at the evidence about new and important issues in the hospital industry. The Changing Hospital Industry: Comparing Not-for-Profit and For-Profit Institutions will have significant implications for public-policy reforms in this vital industry and will be of great interest to scholars in the fields of health economics, public finance, hospital organization, and management; and to health services researchers.

The aim of this edited collection of essays is to examine the relationship between private law and power – both the public power of the state and the 'private' power of institutions and individuals. It describes and critically assesses the way that private law doctrines, institutions, processes and rules express, moderate, facilitate and control relationships of power. The various chapters of this work examine the dynamics of the relationship between private law and power from a number of different perspectives – historical, theoretical, doctrinal and comparative. They have been commissioned from leading experts in the field of private law, from several different Commonwealth Jurisdictions (Australia, the UK, Canada and New Zealand), each with expertise in the particular sphere of their contribution. They aim to illuminate the past and assist in resolving some contemporary, difficult legal issues relating to the shape, scope and content of private law and its difficult relationship with power.

The Common Law of Obligations Springer
Science & Business Media

The development of the law of obligations across the common law world has been, and continues to be, a story of unity and divergence. Its common origins continue to exert a powerful stabilising influence, carried forward by a methodology that places heavy weight on the historical foundations of legal principles. Divergence is, however, produced by numerous factors, including national and international human rights instruments, local statutory regimes, civil law influences, regional harmonisation, local circumstances and values and different political and legal cultures. The essays in this collection explore the forces that produce divergence,

the countervailing forces that generate cohesion and consistency in the common law of obligations, and the influence that the major common law jurisdictions continue to exert over one another in this area of law.

The chapters in this book were originally presented at the Seventh Biennial Conference on the Law of Obligations held in Hong Kong in July 2014. A second collection, entitled *Divergences in Private Law* (ISBN: 9781782256601), will focus on particular departures from the common law mainstream and the causes and effects of those deviations.

Sports Law in Australia Healthy Healing, Inc.

In this report the Communities and Local Government Committee says the Government must stick to its long term house building targets, despite the credit crunch, but a greater proportion of the homes built should be social housing. The Committee is concerned that the £975 million borrowed by the Government from its 2010-11 budgets to build social rented housing now is not new money, and that the Government has been unable to say how that borrowing will be replaced. The

Committee urges the Department for Communities and Local Government to: put pressure on the Treasury to ensure measures to revive the mortgage markets are implemented immediately; increase construction of new social housing, both to provide for housing need and as a means of maintaining capacity in the homebuilding industry whilst the market recovers; accelerate refurbishment programmes for social housing; acquire further social housing through the purchase of unsold stock and street properties; consider the purchase of unsold family homes which have been on the market for more than a year; encourage public sector bodies to make land available for the development of new homes. The report also urges the

Government to do more to help those at risk of repossession by considering sanctions against lenders who repossess too quickly and by doing more to protect tenants and homeowners from unscrupulous landlords. An Office of Fair Trading recommendation for sale-and-rent back schemes should be implemented as a matter of urgency to protect the growing number of households falling behind in mortgage payments. The Committee would like to see more done to support housing associations, including increasing social housing grant where necessary.
