So You Think You're A Good Driver Mountain Lake Press

The prologue contains my reasons for writing this book for teens. The points that I emphasize are:

1. that car ownership is not necessary,
2. that being responsible brings rewards, and
3. that staying healthy and safe are "cool".

In Chapter I, I urge young drivers to get the most out of the educational opportunities afforded them, including reading the state Driver's Manual and their Owner's Manual. In Chapter II, one gets a little idea of the tremendous effort on the part of many great inventors who are responsible for the mobilization that we enjoy today, and who made it possible for the average American family to own a car. Chapter III urges the reader to practice in a safe place, with supervision, in order to become "comfortable in the driver's seat" and to know exactly how his car will respond to every command. Chapter IV describes the outside components of the car, the operations of those components, the care and maintenance thereof, and the diagnosis of and the solution for problems. The operating instructions for a standard transmission are included. Chapter V addresses the functions and maintenance of the battery, fluids, filters and belts. Inside controls are covered in Chapter VI, including adjustment of side mirrors to eliminate blind spots. Also included are instructions on jump starting a dead battery, diagnosing potential problems, seat belt requirements, and much more. Chapter VII instructs the driver on all the motions of actual driving, starting with the positioning of the driver and application of seat belts all the way through to parking the car. It includes backing up, turning around, how best to start the engine in cold weather, and a few insights into human nature. Chapter VIII. Hazardous driving in snow and ice and many other things to be mindful of, such as bicycles, workers, pedestrians, animals and other drivers, covered here in detail. Chapter IX reminds us that good manners never go out of style, and that they play a large part in getting us to "where we want to go". The "greening" of our planet is important to all of us; however, we must beware of pseudo-experts and incomplete information. Chapter X covers the "yin and yang" of "driving green", with good and reasonable "how to" advice. If one could read only one chapter of this book, Chapter XI The Rules of the Road would be my recommendation. No contest. Chapter XII, Insurance Companies, includes auto-accident information. With the memorable words of the famous poet William Wordsworth, in Chapter XIII the author brings home the sad and tragic facts that spurred her to write this book. The EPILOGUE fulfills the promise of the author to teach not only driving and auto-maintenance, but some useful "facts of life". This chapter is her gift because she cares.

Driving You Safely Caffman

Driverthink is not just another "Go Slow" Safe Driving guidebook. Within its pages are reality based driving tips, ideas and suggestions that can literally save your life For too long, the focus on safe driving has been to expound "Politically Correct" driving concepts that simply don't take into account the Reality of driving a vehicle at high speed on modern roads and highways. Otherwise responsible people don't suddenly shed their responsibility when they slip behind the wheel. But they don't often really think about their driving either. Thus the title "Driverthink." In order to be responsible, safe drivers, we need to think about our driving. We need to know our machines, know our limitations, maximize our driving skills and gain driving experience as quickly as possible. Driverthink breaks new ground by exploring each of these areas in lively, entertaining detail. Drive Fast or Drive Slow - but "Driverthink" when you drive Driverthink is a collection of articles from the popular blog of the same name. Written in a lively and entertaining style, each of the articles explore specific driving situations or issues in detail, offering driving tips, ideas and suggestions on how to deal with the different situations. Driverthink is an excellent review for the seasoned driver and a must read for the newer, less experienced driver. Driverthink would suggest that Speed may kill, but unskilled driving can definitely kill. Does the average driver even know what over steer or under steer are? Do they know what kind of rear suspension they're driving on? Do they really understand how these most basic driving concepts will affect the handling of their vehicles - especially in an emergency situation? Driving on our roads and highways must be about reality. It is dealing with that reality that will keep us alive. Following "standard issue," politically correct advice offered by those with limited skills and no appreciation for the realities of driving, simply doesn't create safer driving. "Just Slow Down," might not be the best advice on a highway where even the slow lanes are doing limit plus ten. High speed rear end accidents can really ruin the day and excessively slow driving will most surely restrict traffic flow. Perhaps it's not the best advice after all Driverthink is a most serious effort by the author, to start really saving lives on our Highways and Byways. It will help you to become a much safer "Driverthink" driver It may even save your life.

There are two phases to learning to drive. In the first phase you will learn to maneuver your vehicle. There are three basic maneuvers of a vehicle: you can make a right turn, a left turn and a lane change. Think of it this way: parking is no more than a right or left turn; in expressway driving you lane change to get on, lane change while on, and lane change to get off; and even city driving you are either making a turn or a lane change. In the second phase you are learning the laws of the roadway, general rules people drive by, and the safest way of getting to where you are going.
