Learning to drive is an exciting rite of passage, it's the first of a string of events that your teen will experience as they grow from child to adult. With the excitement of learning to drive and a shiny new car, preaching the dangers of driving may seem like just another killjoy in the life of a teen. It's so important to educate new drivers about how they can protect themselves while driving. A common-sense driving book for teenagers, which recognizes and addresses the difference between the teen brain and that of an adult. Parents, investing in this book for your teen will teach them how to survive while learning to drive rather than becoming another teenage statistic. It won't teach them how to parallel park, make a three-point turn or how to pass a written test. They can easily learn these skills elsewhere. This book will provide the tools for your teen to recognize and avoid hazardous situations and unsafe drivers. It will show them how to train their inexperienced, teenage brains to make safe, split-second decisions when life-threatening events occur. In this book, I have shared the knowledge gained over many years of driving experience to help keep your teen alive while driving. Now help them to understand and apply this knowledge. Don't just give them this book. Make sure they read it.

Most of the information available to parents of teen drivers acknowledges that driving is risky, and then advises parents that their obligation is to teach their teens how to operate a vehicle—but little more. Missing from most available resources are explanations of why teen driving is so dangerous, and specific, proactive steps that parents can take day-by-day, each time a teen driver gets behind the wheel, to counteract the situations that most often lead to crashes. Not So Fast fills this gap in the existing literature, providing advice to parents, guardians, and other adults who supervise teen drivers about the critical decisions that must be made before a teen drives. Not So Fast empowers and guides parents to:

- Evaluate the circumstances of every driving trip
- Be able to say " No " when necessary
- Prepare a " flight plan " for each drive
- Become an informed, proactive supervisor
- Control distracted driving and texting
- Put safety before convenience
- Manage curfews, and much more

Since losing his 17-year-old son Reid in a one-car crash in 2006, Tim Hollister has become a national authority and spokesperson for safer teen driving, serving on a Connecticut state task force to overhaul his state's teen driving laws; launching From Reid ' s Dad, a national blog for parents of teen drivers; appearing as an expert commentator on regional TV and radio; and being awarded the US Department of Transportation Public Service Award, the nation ' s highest civilian award for traffic safety. Sandy Spavone is the executive director of National Organizations for Youth Safety (NOYS), a coalition of national organizations that promote youth empowerment and leadership and build

partnerships that save lives, prevent injuries, and enhance safe and healthy lifestyles among all youth.

[A Design for Safe Driving](#) Simon & Schuster Books For Young Readers

The prologue contains my reasons for writing this book for teens. The points that I emphasize are: 1. that car ownership is not necessary, 2. that being responsible brings rewards, and 3. that staying healthy and safe are "cool". In Chapter I, I urge young drivers to get the most out of the educational opportunities afforded them, including reading the state Driver's Manual and their Owner's Manual. In Chapter II, one gets a little idea of the tremendous effort on the part of many great inventors who are responsible for the mobilization that we enjoy today, and who made it possible for the average American family to own a car. Chapter III urges the reader to practice in a safe place, with supervision, in order to become "comfortable in the driver's seat" and to know exactly how his car will respond to every command. Chapter IV describes the outside components of the car, the operations of those components, the care and maintenance thereof, and the diagnosis of and the solution for problems. The operating instructions for a standard transmission are included. Chapter V addresses the functions and maintenance of the battery, fluids, filters and belts. Inside controls are covered in Chapter VI, including adjustment of side mirrors to eliminate blind spots. Also included are instructions on jump starting a dead battery, diagnosing potential problems, seat belt requirements, and much more. Chapter VII instructs the driver on all the motions of actual driving, starting with the positioning of the driver and application of seat belts all the way through to parking the car. It includes backing up, turning around, how best to start the engine in cold weather, and a few insights into human nature. Chapter VIII. Hazardous driving in snow and ice and many other things to be mindful of, such as bicycles, workers, pedestrians, animals and other drivers, covered here in detail. Chapter IX reminds us that good manners never go out of style, and that they play a large part in getting us to "where we want to go". The "greening" of our planet is important to all of us; however, we must beware of pseudo-experts and incomplete information. Chapter X covers the "yin and yang" of "driving green", with good and reasonable "how to" advice. If one could read only one chapter of this book, Chapter XI The Rules of the Road would be my recommendation. No contest. Chapter XII, Insurance Companies, includes auto-accident information. With the memorable words of the famous poet William Wordsworth, in Chapter XIII the author brings home the sad and tragic facts that spurred her to write this book. The EPILOGUE fulfills the promise of the author to teach not only driving and auto-maintenance, but some useful "facts of life". This chapter is her gift because she cares.

Teen Driving Strategies Caffman

Teenagers are by far the most dangerous age group on the road: a 16-year-old is 12 times as likely as older drivers to die in a crash as a single occupant; put two young teens in a vehicle, and the odds of death and injury nearly double. Safe Young Drivers helps to address this enormous problem. It is an indispensable guide for teaching teens to drive. Intended for parents and teens to use together, it addresses parental issues such as how to choose a car for your teen, and provides teens with simple instruction and important tips to remember. With simple graphics, a complete index, and a section called Some ABCs for the Road, Safe Young Drivers is a valuable tool for all new drivers and their teachers.

Parallel Parking Is Easy (and Other Lies) Simon and Schuster

Driverthink is not just another "Go Slow" Safe Driving guidebook. Within its pages are reality based driving tips, ideas and suggestions that can literally save your life For too long, the focus on safe driving has been to expound "Politically Correct" driving concepts that simply don't take into account the Reality of driving a vehicle at high speed on modern roads and highways. Otherwise responsible people don't suddenly shed their responsibility when they slip behind the wheel. But they don't often really think about their driving either. Thus the title "Driverthink." In order to be responsible, safe drivers, we need to think about our driving. We need to know our machines, know our limitations, maximize our driving skills and gain driving experience as quickly as possible. Driverthink breaks new ground by exploring each of these areas in lively, entertaining detail. Drive Fast or Drive Slow - but "Driverthink" when you drive Driverthink is a collection of articles from the popular blog of the same name. Written in a lively and entertaining style, each of the articles explore specific driving situations or issues in detail, offering driving tips, ideas and suggestions on how to deal with the different situations. Driverthink is an excellent review for the seasoned driver and a must read for the newer, less experienced driver. Driverthink would suggest that Speed may kill, but unskilled driving can definitely kill. Does the average driver even know what over steer or under steer are? Do they know what kind of rear suspension they're driving on? Do they really understand how these most basic driving concepts will affect the handling of their vehicles - especially in an emergency situation? Driving on our roads and highways must be about reality. It is dealing with that reality that will keep us alive. Following "standard issue," politically correct advice offered by those with limited skills and no appreciation for the realities of driving, simply doesn't create safer driving. "Just Slow Down," might not be the best advice on a highway where even the slow lanes are doing limit plus ten. High speed rear end accidents can really ruin the day and excessively slow driving will most surely restrict traffic flow. Perhaps it's not the best advice after all Driverthink is a most serious effort by the author, to start really saving lives on our Highways and Byways. It will help you to become a much safer "Driverthink" driver It may even save your life.

In spite of better-engineered vehicles and roads, traffic accidents are increasing. Why? Drivers are now better prepared and trained. Accidents are also mostly preventable if only drivers learn defensive driving and accident avoidance techniques. It teaches among other things, to be helpful, courteous, and defensive regardless of who is at fault

but who has the last clear chance to avoid the accident. It 's easy to learn and to execute. Without knowledge of defensive driving and accident avoidance techniques, that person is considered half a driver. We can ' t continue the carnage in the roads; it ' s expensive and can result in losing health and/or life. In this book, 1001 Ways to Drive Defensively, for your safety and driving enjoyment, the ideas are sometimes repeated because driving is a repetition of the same maneuvers for any trip made. To help remember the procedures, it is presented in different ways. It is also not organized chronologically because when we are behind the wheel, things don ' t happen in logical order; the situations and circumstances do dictate. The author has a bachelor ' s degree in education. He has been a North American driver for almost fifty years, most of which were in Cold Alberta, Canada, where winter could last for six months. You guessed it—lots of traffic accidents. Thus, the knowledge of defensive driving was a must. In Alberta, he was a schoolteacher, operated a driving school, a driving instructor and driver examiner. Author urges safety-conscious individuals not to wait any longer; get a copy of 1001 Ways to Drive Defensively. It makes driving enjoyable, less stressful, and most of all, you ' ll experience safety whenever you are behind the wheel. Don ' t forget you ' re protecting the most expensive thing that was created, and no amount of money can replace it. This book is suitable for all drivers. However, discretion is necessary; you might save one or two accidents in what is left of your driving days. We all have to pitch in and help make the roads safer. No government can do it alone. We must not forget that other drivers are our friends we haven ' t met. Why don ' t we help them and, in the process, help ourselves too? In an accident, regardless of who is at fault, we ' ll still suffer the same consequences. It takes only a second or two to help versus days or months recuperating. Some drivers make this statement, " whatever I do, if other drivers make a mistake what can I do? " Drivers that have this kind of reasoning forget that to be safe, one does not only drive their vehicle, follow traffic rules, but help other driver if they make a mistake. Apply defensive driving technique if one notices a condition that can develop into vehicle conflict. This book will make a perfect gift for anybody, for any occasion and they will be grateful and remember you for life.

Safe Driving is No Accident Simon and Schuster

No one will admit to being a terrible driver, but we've all, at one point or another, tried multitasking while driving behind the wheel on the road. Most of us have also gone on long road trips by car. This book can help you avoid the costly mistakes that far too many drivers make because of not being fully aware of their driving risk. Much is said about driving safely and defensively but little is taught about HOW to manage the actual risk involved. In each section of the book are exercises for both experienced and inexperienced drivers that will greatly reduce your chances of collision. The added bonus is also less stress. It is an in depth look at an unseen epidemic that is on going every day in all the lives of drivers here in the U.S. (averaging 200 deaths daily)and in fact throughout the entire world (1.3+ million deaths every year). From how we all drive to an actionable plan to end this epidemic. The book will take you on a "trip" of self discovery that will challenge you as either a new driver or very experienced.
