Driverthink is not just another "Go Slow" Safe Driving guidebook. Within its pages are reality based driving tips, ideas and suggestions that can literally save your life For too long, the

focus on safe driving has been to expound "Politically Correct" driving concepts that simply don't take into account the Reality of driving a vehicle at high speed on modern roads and highways. Otherwise responsible people don't suddenly shed their responsibility when they slip behind the wheel. But they don't often really think about their driving either. Thus the title "Driverthink." In order to be responsible, safe drivers, we need to think about our driving. We need to know our machines, know our limitations, maximize our driving skills and gain driving experience as quickly as possible. Driverthink breaks new ground by exploring each of these areas in lively, entertaining detail. Drive Fast or Drive Slow - but "Driverthink" when you drive Driverthink is a collection of articles from the popular blog of the same name. Written in a lively and entertaining style, each of the articles explore specific driving situations or issues in detail, offering driving tips, ideas and suggestions on how to deal with the different situations. Driverthink is an excellent review for the seasoned driver and a must read for the newer, less experienced driver. Driverthink would suggest that Speed may kill, but unskilled driving can definitely kill. Does the average driver even know what over steer or under steer are? Do they know what kind of rear suspension they're driving on? Do they really understand how these most basic driving concepts will affect the handling of their vehicles - especially in an emergency situation? Driving on our roads and highways must be about reality. It is dealing with that reality that will keep us alive. Following "standard issue," politically correct advice offered by those with limited skills and no appreciation for the realities of driving, simply doesn't create

safer driving. "Just Slow Down," might not be the best advice on a highway where even the slow lanes are doing limit plus ten. High speed rear end accidents can really ruin the day and excessively slow driving will most surely restrict traffic flow. Perhaps it's not the best advice after all Driverthink is a most serious effort by the author, to start really saving lives on our Highways and Byways. It will help you to become a much safer "Driverthink" driver It may even save your life.

To teenagers, a driver's license is the equivalent of the Holy Grail. Driving is cool. Unfortunately, most driver education classes offered in high schools and commercial driving schools aren't thorough enough to teach teenagers what they need to know when they take the wheel of a two-ton vehicle. Most kids have only a few hours of actual road experience when they get their license. That inexperience can be lethal. Vehicle accidents are the leading cause of death and injury for 15- to 19-year-olds in the United States. Author Phil Berardelli believes parents have no choice but to teach their kids how to drive. He taught his own two daughters, and with his book "Safe Young Drivers: A Guide for Parents and Teens", he can help parents to teach their own kids. In "Safe Young Drivers", Berardelli takes parents and teens from the empty parking lot to the crowded highway with the use of skill-building exercises, instructive illustrations and common-sense advice. He provides 10 steps for helping students acquire basic driving skills. As they master each set of skills, they move to the next. Good attitude is as important as good skills, so Berardelli also offers five themes: Clear the way, learn the limits, share the road, think ahead, and feel the road. By adopting the attitude of a responsible driver, Berardelli says, students may actually compensate for the lack of driving skills and can avoid dangerous road situations altogether. Designed for parents who are willing to take the time to teach their teenagers to drive, "Safe Young Drivers" helps parents tailor driving lessons according to the ability and maturity levels of the teen. Some sections are addressed to parents, and othersto teens. Teaching kids to drive takes dedication and time, but Berardelli's book makes the task easier. It also can save lives!

There are two phases to learning to drive. In the first phase you will learn to maneuver your vehicle. There are three basic maneuvers of a vehicle: you can make a right turn, a left turn and a lane change. Think of it this way: parking is no more than a right or left turn; in expressway driving you lane change to get on, lane change while on, and lane change to get off; and even city driving you are either making a turn or a lane change. In the second phase you are learning the laws of the roadway, general rules people drive by, and the safest way of getting to where you are going.
