This volume was first published by Inter-Disciplinary Press in 2015.

Storytelling has always played a central role in the formation of cultures and communities. All cultures define themselves and their place in the world through their stories. Similarly, our identities are largely constructed as narratives, and it is with the aid of storytelling that we manage to conceive of ourselves – our selves – as meaningful wholes. Thus, storytelling is not ever absent: it is to be found in literature, social life, in the places we visit and the buildings we live in. This volume presents storytelling in various appearances: from ancient myths and oral history, to transmedia narratives and digital stories. Different forms of narrative are analysed, as is the use of storytelling as a method for e.g. counselling, education and research. Throughout twenty-five chapters, a compelling overview of recent research on the topic is provided, both stressing the omnipresence of storytelling and exploring what storytelling is and isn't.

The Dead Will Arise tells the story of Nongqawuse, the young Xhosa girl whose prophecy of the resurrection of the dead lured an entire people to death by starvation. The Great Cattle-Killing of 1856-57, which she initiated, is one of the most extraordinary and misunderstood events in South Africa's history. Jeff Peires was the first historian to draw on all available sources, from oral tradition and obscure Xhosa texts to the private letters and secret reports of police informers and colonial officials, and the original edition of The Dead Will Arise won the 1989 Alan Paton Sunday Times award for non-fiction.

Teaching English As a First Additional Language in the Foundation Phase University of Kwazulu Natal Press

This book presents current research on dyslexia in languages other than English. It is increasingly evident that it is essential to define dyslexia in terms of the language of instruction because learning to read cannot be separated from the linguistic parameters of that language. Differences in the orthographic, phonological, morphemic and inflectional structure of a language influence the degree of difficulty encountered by children when learning to read. Consequently, authors describe the linguistic properties of their languages and discuss the problems encountered by dyslexics in that language and the dyslexics' underlying cognitive deficits. The objective of this book is to explore a variety of languages and to identify both the language specific characteristics of reading and spelling problems in each language and the core deficits that are common to all dyslexics regardless of the language of instruction.

Samuel Edward Krune Mqhayi (1875-1945) was the most prominent South African imbongi of his day, a Xhosa oral poet who declaimed his impromptu poetry on occasions of significance to his people. The author of numerous works of poetry, fiction and non-fiction, biography, autobiography, and translation, Mqhayi's contributions to Xhosa-language newspapers remains unparalleled in scope and volume. This book reclaims and

assembles a chronological sequence of Mqhayi's occasional poems, for the most part now unknown. Sixty poems celebrate significant events in the calendar, on occasions of national or international importance. They constitute Iziganeko zesizwe, a chronicle of the nation, between 1900 and 1943: poetic responses to events from the perspective of the greatest figure in Xhosa literature. Wars feature prominently in these occasional poems—the Boer War, the First World War, the invasion of Abyssinia, and the Second World War—as do political deputations to England, visits from British princes and the death of British kings, the appearance of Halley's Comet, and meetings with Ministers of State. Running through the collection is Mqhayi's proud and fierce determination to maintain an identity rooted in custom and history in the face of territorial dispossession, the loss of title deeds and the vote, and the steady erosion of human rights. Throughout these years, Mqhayi remained constant in offering praise and encouragement to his people, in celebrating their achievements, and in expressing Christian consolation and an unflinching faith in the future liberation of South Africa's black population from foreign control. Second Language Writing Systems looks at how people learn and use a second language writing system, arguing that they are affected by characteristics of the first and second writing systems, to a certain extent independently of the languages involved. This book presents for the first time the effects of writing systems on language reading and writing and on language awareness, and provides a new platform for discussing bilingualism, biliteracy and writing systems. The approach is interdisciplinary, with contributions not only from applied linguists and psychologists but also corpus linguists, educators and phoneticians. A variety of topics are covered, from handwriting to spelling, word recognition to the mental lexicon, and language textbooks to metalinguistic awareness. Though most of the studies concern adult L2 learners and users, other populations covered include minority children, immersion students and bilingual children. While the emphasis is on English as the L2 writing system, many other writing systems are analysed as L1 or L2: Arabic, Chinese, Dutch, Gujarati, Indonesian, Irish, Italian and Japanese. Approaches that are represented include contrastive analysis, transfer, poststructuralism, connectionism and corpus analysis. The readership is SLA and bilingualism researchers, students and teachers around the world; language teachers will also find much food for thought.

Providing clear, pedagogical steps and curriculum guidance, this practical book focuses on laying the strong foundation that is needed to assist learners in using English as the language of learning and teaching (LoLT) from grade four onward. In grade four, the majority of learners make the transition from their home

language to English as the LoLT; to assist learners in this transition, it is important that teachers introduce English into the classroom from as early as Grade R (reception year, prior to starting grade one). The earlier learners are exposed to English, the more proficient they will become. Included in this book are strategies for introducing English into the classroom, techniques for teaching English alongside learners' home language, teaching resources for classroom use, and ideas for planning lessons.

Oxford University Press

This five-volume collection lays out the foundations and nuances of literacy studies. Beginning with the theoretical and epistemological perspectives that have been influential in shaping contemporary approaches in literacy studies, the set further explores new digital literacies, literacy in educational and institutional contexts, and the crucial issues of literacy in relation to social mobility, multilingualism and globalization. With a full introduction to the set and to each volume, researchers will find in this set a comprehensive guide to this crucial area of study.

Dyslexia in Different Languages John Wiley & Sons

This study on the psycholinguistics of spelling supplies the theoretical framework necessary to understand how children's ability to write is related to their ability to speak a language. The importance of learning to spell is highlighted, and the findings presented outline the implications for how spelling should best be taught.

LOITASA Palgrave Macmillan

This book highlights the need to develop new educational perspectives in which multilingualism is valorised and strategically used in settings and contexts of instruction and learning. Situated in the current educational debate about multilingualism and ethno-linguistic minorities, chapter authors examine the polarised response to heightened linguistic diversity and how the debate is very much premised on binary views of monolingualism and multi- or bilingualism. Contributors argue that the diverse linguistic backgrounds of immigrant and minority students should be considered an asset, instead of being regarded as a barrier to teaching and learning. From its title through to its conclusion, this book underlines the current perspective of multilingualism as possessing cutting edge potential for transforming diverse classrooms into more inhabitable, more equitable and more efficiently organised spaces for learning. This book will be of interest to scholars and researchers in educational linguistics, applied linguistics, sociolinguistics, anthropological linguistics, pedagogics, educational studies, and educational anthropology.

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.” —Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by

the end of South Africa ' s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man ' s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother ' s unconventional, unconditional love.

What does liberal order actually amount to outside the West, where it has been most institutionalised? Contrary to the Atlantic or Pacific, liberal hegemony is thin in the Indian Ocean World; there are no equivalents of NATO, the EU or the US-Japan defence relationship. Yet what this book calls the 'Global Indian Ocean' was the beating heart of earlier epochs of globalisation, where experiments in international order, market integration and cosmopolitanisms were pioneered. Moreover, it is in this macro-region that today's challenges will face their defining hour: climate change, pandemics, and the geopolitical contest pitting China and Pakistan against the USA and India. The Global Indian Ocean states represent the greatest range of political systems and ideologies in any region, from Hindu-nationalist India and nascent democracy in Indonesia and South Africa, to the Gulf's mixture of tribal monarchy and high modernism. These essays by leading scholars examine key aspects of political order, and their roots in the colonial and pre-colonial past, through the lenses of state-building, nationalism, international security, religious identity and economic development. The emergent lessons are of great importance for the world, as the 'global' liberal order fades and new alternatives struggle to be born.

Historically, students from ethnically, linguistically, and economically diverse backgrounds have been overlooked and underidentified for gifted services. The Young Scholars Model is a comprehensive approach to addressing the issue of underrepresentation through engagement of a schoolwide effort and commitment. This book: Shares how the model leads to increased representation in identification and student success in advanced academic programs. Describes the four major components of the model and how they integrate in practice. Supports efforts to find and nurture potential in students who have historically been overlooked for gifted services. Includes steps for implementation and practical guidelines that schools and districts will be able to follow with fidelity and success.
