Indigenous Language Media, Language Politics and Democracy in Africa Routledge

"Why are you learning Zulu?" When Mark Sanders began studying the language, he was often asked this question. In *Learning Zulu*, Sanders places his own endeavors within a wider context to uncover how, in the past 150 years of South African history, Zulu became a battleground for issues of

property, possession, and deprivation. Sanders combines elements of analysis and memoir to explore a complex cultural history. Perceiving that colonial learners of Zulu saw themselves as repairing harm done to Africans by Europeans, Sanders reveals deeper motives at work in the development of Zulu-language learning—from the emergence of the pidgin Fanagalo among missionaries and traders in the nineteenth century to widespread efforts, in the twentieth and twenty-first centuries, to teach a correct form of Zulu. Sanders looks at the white appropriation of Zulu language, music, and dance in South African culture, and at the association of Zulu with a martial masculinity. In exploring how Zulu has come to represent what is most properly and powerfully African, Sanders examines differences in English- and Zulu-language press coverage of an important trial, as well as the role of linguistic purism in xenophobic violence in South Africa. Through one person's efforts to learn the Zulu language, *Learning Zulu* explores how a language's history and politics influence all individuals in a multilingual society. Grounded in ethnography, this monograph explores the ambiguity of English as a lingua franca by focusing on identity politics of language and race in contemporary South Africa. The book adopts a multidisciplinary approach which highlights how ways of speaking English constructs identities in a multilingual context. Focusing primarily on isiZulu and Afrikaans speakers, it raises critical questions around power and ideology. The study draws from literature on English as a lingua franca, raciolinguistics, and the cultural politics of English and dialogues between these fields. It challenges long-held concepts underpinning existing research from the global North by highlighting how they do not transfer and apply to identity politics of language in South Africa. It sketches out how these struggles for belonging are reflected in marginalisation and empowerment and a vast range of local, global and glocal identity trajectories. Ultimately, it offers a first lens through which global scholarship on English as a lingua franca can be decolonised in terms of disciplinary limitations, geopolitical orientations and a focus on the politics of race that characterize the use of English as a lingua franca all over the world. This book will be of interest to students and researchers in linguistic anthropology, sociolinguistics, World Englishes, ELF and African studies.

Various forms of academic co-operation criss-cross the modern university system in a bewildering number of ways, from the open exchange of ideas and knowledge, to the sharing of research results, and frank discussions about research challenges. Embedded in these scholarly networks is the question of whether a 'global template' for the management of both higher education and national research organisations is necessary, and if so, must institutions slavishly follow the high-flown language of the global 'knowledge society' or risk falling behind in the ubiquitous university ranking system? Or are there alternatives that can achieve a better, 'more ethically inclined, world? Basing their observations on their own experiences, an interesting mix of seasoned scholars and new voices from southern Africa and the Nordic region offer critical perspectives on issues of inter- and cross-regional academic co-operation. Several of the chapters also touch on the evolution of the higher education sector in the two regions. An absorbing and intelligent study, this

book will be invaluable for anyone interested in the strategies scholars are using to adapt to the interconnectedness of the modern world. It offers fresh insights into how academics are attempting to protect the spaces in which they can freely and openly debate the challenges they face, while aiming to transform higher education, and foster scholarly collaboration. The Southern African-Nordic Centre (SANORD) is a partnership of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. SANORD's primary aim is to promote multilateral research co-operation on matters of importance to the development of both regions. Our activities are based on the values of democracy, equity, and mutually beneficial academic engagement.

The word disaster is much used in the world of soccer - conceding a penalty, a sending off, an untimely defeat. Comparing these with real life disasters puts things into perspective and the results of the games become insignificant. Soccer is not more important than life or death! For the first time, real life tragedies in the world of soccer are explored in one volume. From the loss of life of talented young players in the Munich and Zambian air disasters to fatal overcrowding at Hillsborough and Moscow. During the history of the game, fans and players alike have been the victims of negligence,

complacency and misfortune. The causes, consequences and legacies of these and other disasters are examined in this book that reveals frightening parallels and important lessons. A powerful book suitable for students of sociology, sports studies and social history. This volume was previously published as a special issue of the journal *Sport in the Global Society*.

The texts comprise the original isiZulu hymns as well as English translations, and are brought to life with an accompanying compact disc of song, story and interview excerpts. These include detail about the seminal moment of change and controversy in the 1990s, when the organ was introduced by church member and ethnomusicologist, Bongani Mthethwa, to accompany the Shembe hymnal repertory. The initiative gave birth to dozens of youth choirs who sang the hymns in a new style, and began to compose their own repertory about Shembe in a more 'gospel-inflected' musical version of their faith. --

The strikingly unrestricted syntactic distribution of nouns in many Bantu languages often leads to proposals that syntactic case does not play an active role in the grammar of Bantu. This book offers a different conclusion that the basis of Zulu that Bantu languages have not only a system of structural case, but also a complex system of

morphological case that is comparable to systems found in languages like Icelandic. By comparing the system of argument licensing found in Zulu to those found in more familiar languages, Halpert introduces a number of insights onto the organization of the grammar. First, while this book argues in favor of a case-licensing analysis of Zulu, it locates the positions where case is assigned lower in the clause than what is found in nominative-accusative languages. In addition, Zulu shows evidence that case and agreement are two distinct operations in the language, located on different heads and operating independently of each other. Despite these unfamiliarities, there is evidence that the timing relationships between operations mirror those found in other languages. Second, this book proposes a novel type of morphological case that serves to mask many structural licensing effects in Zulu; the effects of this case are unfamiliar, Halpert argues that its existence is expected given the current typological picture of case. Finally, this book explores the consequences of case and agreement as dissociated operations, showing that given this situation, other unusual properties of Bantu languages, such as hyper-raising, are a natural result. This exploration yields the conclusion that some of the more unusual properties of Bantu languages in fact result from small amounts of variation to deeply familiar syntactic principles such as case, agreement, and the EPP.

Engaging Students through Social Media Routledge

This book argues for the essential use of drawing as a tool for science teaching and learning. The authors are working in schools, universities, and continual science learning (CSL) settings around the world. They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking – sometimes direct observation and in other

instances, their memories. The result is a collection of research and essays that offer theory, techniques, outcomes, and models for the reader. Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms. Secondary students describe their ideas of chemistry and physics. Teacher educators use drawings to consider the progress of their undergraduates' understanding of science teaching and even their moral/ethical responses to teaching about climate change. Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted. A physician explains how the history of drawing has been a critical tool to medical education and doctor-patient communications. Each chapter contains samples, insights, and where applicable, analysis techniques. The chapters in this book should be helpful to researchers and teachers alike, across the teaching and learning continuum. The sections are divided by the kinds of activities for which drawing has historically been used in science education: An instance of observation (Audubon, Linnaeus); A process (how plants grow over time, what happens when chemicals combine); Conceptions of what science is and who does it; Images of identity development in science teaching and learning.

Zulu Woman Multilingual Matters

As the colonial hegemony of empire fades around the world, the role of language in ethnic conflict has become increasingly topical, as have issues concerning the right of speakers to choose and use their preferred language(s). Such rights are often asserted and defended in response to their being violated. The importance of understanding these events and issues, and their relationship to individual, ethnic, and national identity, is central to research and debate in a range of fields outside of, as well as within, linguistics. This book provides a clearly written introduction for linguists and non-specialists alike, presenting basic facts about the role of language in the formation of identity and the preservation of culture. It articulates and explores categories of conflict and language rights abuses through detailed presentation of illustrative case studies, and distills from these key cross-linguistic and cross-cultural generalizations.

The Age of Sustainability African Minds

First published in 1975, this book offers a critique of some of the 'new perspectives' in the sociology of education. This is achieved through a case study of a progressive child centred school. The book suggests that a liberal approach to education fails to appreciate how thoroughly a complex, stratified industrial society penetrates the school. It argues that the practice of 'progressive' education may be a modern form of conservatism and an effective form of social control both in the narrow sense of achieving classroom discipline and in the wider sense of contributing to the promotion of a static social order. It cautions against naïve utopian solutions which see the freedom and self-development of the child as an individualized process, unrelated to a social context which may undermine the ideals of freedom and spontaneous self-development. In addition to offering a study of the implementation of the 'open' approach to child development and pedagogy, the book can also be read as a piece of critical sociology, intended to make the reader look again at the way in which problems have been generated and solutions proposed within sociology and education.

The distribution of incomes in South Africa in 2004, ten years after the transition to democracy, was probably more unequal than it had been under apartheid. In this book, Jeremy Seekings and Nicoli Nattrass explain why this is so, offering a detailed and comprehensive analysis of inequality in South Africa from the midtwentieth century to the early twenty-first century. They show that the basis of inequality shifted in the last decades of the twentieth century from race to class. Formal deracialization of public policy did not reduce the actual disadvantages experienced by the poor nor the advantages of the rich. The fundamental continuity in patterns of advantage and disadvantage resulted from underlying continuities in public policy, or what Seekings and Nattrass call the “distributional regime.” The post-apartheid distributional regime continues to divide South Africans into insiders and outsiders. The insiders, now increasingly multiracial, enjoy good access to well-paid, skilled jobs; the outsiders lack skills and

employment.
