The application of multibeam and sediment transport measurement technologies and the adoption of multi-faceted research methodologies have greatly advanced our understanding of the sedimentary processes on continental shelves in the last decade. This book uniquely blends cutting-edge research and state-of-the art review articles that take stock of new advances in multibeam mapping and sediment transport technologies, spatial analysis and modelling, and the applications

of these advances to the understanding of shelf sediments, morphodynamics, and sedimentary processes. Case studies are also presented to illustrate the utilization of seabed property and process knowledge in habitat mapping and ocean management With its mix of papers focusing on technological advances, integration of shelf morphology and processes, and the application of these advances to coastal and ocean management, this Special Publication volume will serve as a milestone reference for professional marine scientists and as advanced text for students in marine geology, sedimentology and oceanography. This book is part of the International Association of Sedimentologists (IAS) Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Papers are reviewed and printed to the same high standards as those published in the journal Sedimentology and several of these volumes have become standard

Enlightenment thinkers such as Rousseau and Montesquieu are best known for their humanist theories and liberating influence on Western civilization. But as renowned French intellectual Louis Sala-Molins shows, Enlightenment discourses and scholars were also complicit in the Atlantic slave trade, becoming instruments of oppression and inequality. Translated into English for the first time, *Dark Side of the Light* scrutinizes Condorcet's *Reflections on Negro Slavery* and the works of Montesquieu, Rousseau, and Diderot side by side with the Code Noir (the royal

---

document that codified the rules of French Caribbean slavery) in order to uncover attempts to uphold the humanist project of the Enlightenment while simultaneously justifying slavery. Wielding the pen of both the ironist and the moralist, Sala-Molins demonstrates the flawed nature of these attempts and the reasons given for this denial of rights, from the imperatives of public order to the incomplete humanity of the slave (and thus the need for his progressive humanization through slavery), to the economic prosperity that depended on his labor. At the same time, Sala-Molins uses the techniques of literature to give equal weight to the perspective of the “barefooted, the starving, and the slaves” through expository prose and scenes between slave and philosopher, giving moral agency and flesh-and-blood dimensions to issues most often treated as abstractions. Both an urgent critique and a measured analysis, *Dark Side of the Light* reveals the moral paradoxes of Enlightenment philosophies and their world-changing consequences. Louis Sala-

Molins is a moral and political philosopher and emeritus professor at the University of Toulouse. He is the author of many books, including *Le Code Noir, ou Le calvaire de Canaan* and *L' Afrique aux Amériques*. John Conteh-Morgan is associate professor of French and Francophone, African-American, and African studies at Ohio State University. He is the author of *Theatre and Drama in Francophone Africa: A Critical Introduction. A Bibliography and Reader's Guide to the First Editions* of P. G. Wodehouse Cambridge University Press

more than 9,500 English, French and German titles. The collection is sourced from the remarkable library of Victor Amadeus, whose Castle Corvey collection was one of the most spectacular discoveries of the late 1970s. The Corvey Collection comprises one of the most important collections of Romantic era writing in existence anywhere -- including fiction, short prose, dramatic works, poetry, and more -- with a focus on especially difficult-to-find works by lesser-known, historically neglected writers. The Corvey library was built during the last half of the 19th century by Victor and his wife Elise, both bibliophiles with varied interests. The collection thus contains everything from novels and short stories to belles lettres and more populist works, and includes many exceedingly rare works not available in any other collection from the period. These invaluable, sometimes previously unknown works are of particular interest to scholars and researchers.

European Literature, 1790-1840: The Corvey Collection includes: \* Novels and Gothic Novels \* Short Stories \* Belles-Lettres \* Short Prose Forms \* Dramatic Works \* Poetry \* Anthologies \* And more Selected with the guidance of an international team of expert advisors, these primary sources are invaluable for a wide range of academic disciplines and areas of study, providing never before possible research opportunities for one of the most studied historical periods. Contemporary Singapore is simultaneously  
a small postcolonial multicultural nation  
state and a cosmopolitan global city. To  
manage fundamental contradictions, the  
state takes the lead in authoring the national  
narrative. This is partly an internal process  
of nation building, but it is also achieved

through more commercially motivated and  
outward facing efforts at nation and city  
branding. Both sets of processes contribute  
to Singapore's capacity to influence foreign  
affairs, if only for national self-preservation.  
For a small state with resource limitations,  
this is mainly through the exercise of smart  
power, or the ability to strategically combine  
soft and hard power resources.

off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines ' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current

improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets Japanese Technical Abstracts Penguin Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Vibration Problems in Machines explains how to infer information about the internal operations of rotating machines from external measurements through methods used to resolve practical plant problems. Second edition includes summary of instrumentation, methods for establishing machine rundown data, relationship between the rundown curves and the ideal frequency response function. The section on balancing has been expanded and examples are given on the strategies for balancing a rotor with a bend, with new section on instabilities. It includes case studies with real plant data, MATLAB® scripts and functions for the modelling and analysis of rotating machines.
