Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Feeling Blue is a football fan's memoir like no other. Spanning more than 35 years and set across three continents, it is a true story that encompasses love, race and identity - all interweaved with the chaotic fall and rise of Manchester City. Dickie Denton was born into a 1960s Manchester home with many siblings, one of whom was adopted and of Asian parentage. As he grew up, Dickie faced the twin challenges of racist bullying and academic underachievement. Football was his refuge and Manchester City became his obsession - through boyhood, coming of age and adulthood. By middle age he had the trappings of a successful international business career but still craved the thing that he most desired and continued to elude him: success for Manchester City. His story dramatically climaxes in 2012, on a sultry May night in Singapore. Feeling Blue is not just for Man City fans, or even just football fans. It is a deeply personal story told with humour and honesty that will appeal to all and bring forth tears and laughter in equal measure.

Miniature vintage and classic caravans - otherwise known as 'tinies' and 'teardrops' - have become hugely popular in recent years, due to their dinkiness and versatility. The good use of compact spaces and the appeal of quality design have always caught Don and Marilyn Jessen's imagination, and their travels have connected them with a wide variety of people at the forefront of the 'tinies' and 'teardrops' movement. This book pulls together a collection of these small but perfectly formed mobile spaces from across Australia and New Zealand.

The controversy over Jacques Derrida's legacy is one of the most effective engines driving the contemporary debate, far beyond the bounds of philosophy. By now, the variety of contesting

positions is so wide that it calls for a critical assessment to achieve a unified theoretical scheme. The dyad of deconstruction and reconstruction, to which the title of the volume refers, aims at composing a kind of map of this debate. The three sections of the book include essays that investigate specific aspects of Derrida's reception, from the view of 1. philosophy, 2. literary studies and 3. politics and law. These contributions study the implications of deconstruction beyond its original scope and intervene by taking stock of its most relevant aporias.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

The application of multibeam and sediment transport measurement technologies and the adoption of multi-faceted research methodologies have greatly advanced our understanding of the sedimentary processes on continental shelves in the last decade. This book uniquely blends cutting-edge research and state-of-the art review articles that take stock of new advances in multibeam mapping and sediment transport technologies, spatial analysis and modelling, and the applications of these advances to the understanding of shelf sediments, morphodynamics, and sedimentary processes. Case studies are also presented to illustrate the utilization of seabed property and process knowledge in habitat mapping and ocean management. With its mix of papers focusing on technological advances, integration of shelf morphology and processes, and the application of these advances to coastal and ocean management, this Special Publication volume will serve as a milestone reference for professional marine scientists and as advanced text for students in marine geology, sedimentology and oceanography. This book is part of the International Association of Sedimentologists (IAS) Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Papers are reviewed and printed to the same high standards as those published in the journal *Sedimentology* and several of these volumes have become standard works of reference.
