Book Of The Year for
2015 | Forbes 15 Best
Business Books of
2015 | "The chapters,
(46 of them in this
256 page book) are
quick and concise,
and it is easy to
pick it up anywhere
and find a nugget of
easily actionable
advice, but the
kicker is that the
actions he recommends
are also quick and

concise, so that we
can accomplish them
in the few bursts of
spare time we all
have left." -

"Follow Goldfayn's
brilliant advice and
you will have an
endless supply of
customer
testimonials,
spontaneous
referrals, and new
business, and it will
compel you to buy a
beautiful fountain
pen and stop
obsessing over social
media. His advice
simply works." -
Inc.com Grow your
business by 15% with
these proven daily
growth actions Do you
have trouble finding
time during your
hectic day to grow
your business? Is
your company stalled
because you are too
busy reacting to
customer problems? Do

you lack the funds to
jumpstart an
effective marketing
plan? The Revenue
Growth Habit gives
business owners,
leaders, and all
customer facing staff
a hands-on resource
for increasing
revenue that is fast,
easy, and requires no
financial investment.
Alex Goldfayn, CEO of
the Evangelist
Marketing Institute,
shows how to grow
your organization by
15% or more in 15
minutes or less per
day—without spending
a penny of your
money. Forget about
relying on social
media. Posting on
Twitter, Facebook,
and LinkedIn doesn't
grow revenue,
especially for
business-to-business
companies. The
Revenue Growth Habit
shows how to request

and collect testimonials and how to communicate these testimonials to grow your business. You will discover how to write powerful case studies, ask for (and get!) referrals, grow your lists, and send a revenue-growing newsletter. Goldfayn also includes information for teaching your customer service people how to inform your current clients about what else they can buy from you. This proven approach revolves around letting your customers tell your story. There is nothing you can say about your products and services that is more effective than what your paying customers say. How does it work? Each day, take one quick, proactive communication action that tells someone about how they'll be improved after buying from you. Choose from the 22 actions Goldfayn details in *The Revenue Growth Habit*. Each technique is fast, simple, and free. It only

requires your personal effort to communicate the value of your product or service to someone who can buy from you. Personal communication—the key to the 22 action steps—will make your company stand head-and-shoulders above the competition.

Lovingly written and beautifully photographed, *Best Boats* is an evaluation of the most elegantly designed and best-built sailboats in stages—from a bare hull to a finished yacht. In addition to evaluating overall design, performance and layout, this book, like no other, analyses how and how well the boats

are built. Ranging from the ageless Herreshoff day-sailer to the ultra-light Santa Cruz flyers, the book features some of the finest works of designers such as German Frers, Chuck Paine, Bill Crealock, Doug Peterson, Lyle Hess, and others. Even more importantly, it contains interviews with legendary builders such as Tom Morris, the Cherubinis, Cecil Lange, and Tom Dreyfus. Using the surveyed boats as examples, *M á t é*; shows what to look for when contemplating the purchase of any sailboat. For the boatbuilder, it points out the weaknesses and strengths of all aspects of construction, using hundreds of photographs and illustrations to clarify.
Cold Stone Jug Macmillan Publishers Aus.
This book provides a superb integration of clinical and research findings on catastrophic brain injury. The clinical chapters address the definition, epidemiology, pathophysiology, and outcome of the most severe closed head injuries that typically result in death or devastating neurobehavioral sequelae. They cover cerebral metabolism following catastrophic brain injury, medical management, pharmacologic treatment for survivors, the impact on the family, and legal and ethical issues. The chapters on experimental research include reviews of recent advances in

characterizing neurochemical interactions contributing to secondary brain injury and of experimental studies of the effects of neural transplantation on cognitive performance in animals. A summary chapter synthesizes the clinical and experimental material, provides an update concerning ongoing clinical trials to evaluate the efficacy of drugs and Rypothermia in the treatment of acute severe head injury, and offers a perspective on future directions of research to mitigate the consequences of severe head injury.

Boating Skills & Seamanship Soyinfo Center

For millennia, humans well-knew that there was a force far more powerful than they upon the Earth, and that was Nature itself. They could only dream of overcoming its power, or try to believe in the myths and fables of others who supposedly had done so. Then, at the dawn of the 19th century, along came a brilliant, creative, controversial American by the name of Robert Fulton. In the late summer of 1807, he ran his experimental "steamboat" from New York City to Albany, not once, but repeatedly. With these continuing commercial trips, Fulton showed that it was possible to alter artificially both a person's location and

the amount of time it took to change it. In so doing, he also broke through an enormous psychological barrier that had existed in people's minds; it was, in fact, possible to overcome Nature to practical effect. But running these steamboats on rivers, lakes and bays was one thing. Taking such a vessel on a voyage across the ocean was a different proposition altogether. Experienced mariners didn't think it could be done. These early steamboats were just too flimsy and unwieldy to withstand the dangers of the deep. Yet there was at least one man who believed otherwise. His name was Captain Moses Rogers. He set out to design a steam vessel that was capable of overcoming the vicissitudes of the sea. This craft would be not a steamboat, but a steamship, the first of its kind. Finding a crew for such a new-fangled contraption proved to be exceedingly difficult. Mariners--conditioned as they were to "knowing the ropes" of a sailing ship--looked upon this new vessel, and its unnatural means of propulsion, with the greatest suspicion. To them, it was not a "Steam Ship"--instead, it was a "Steam Coffin." Automotive Industries West Vancouver, B.C. : Albatross

The world's most comprehensive, well documented, and well illustrated book on this subject. With extensive subject and geographical index. 30 photographs and illustrations - mostly color. Free of charge in digital PDF format.

Catastrophic Brain Injury

Cengage Learning

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Proudly supporting the Royal

Updated to reflect the latest technology in the automotive industry, this book will provide the knowledge and skills needed to successfully inspect, maintain, and repair vehicles of all makes and models.

Automotive Service: Inspection, Maintenance, and Repair, 3E

begins by

introducing readers to a number of automotive career options, shop management basics, plus necessary tools and equipment. The book then progresses to the theories of vehicle systems operations and includes step-by-step procedures for troubleshooting and repairing all major systems of the modern automobile. Updates include coverage of new vehicle technology like EVAP systems, on-board diagnostics and emissions, alternative fuels, and hybrid vehicles, making this book not only comprehensive but also current so that readers can feel confident they are learning the very latest in industry trends and techniques.

Best Boats to Build Or Buy

Prentice Hall

New York Times Bestseller: A Pulitzer Prize – winning author retraces the voyages of Captain James Cook: “ Alternately hilarious, poignant, and insightful. ” —Seattle Times

Captain James Cook ' s three epic journeys in the eighteenth century were the last great voyages of discovery. His ships sailed 150,000 miles, from the Arctic to the Antarctic, from Tasmania to Oregon, from Easter Island to Siberia. When Cook set off for the Pacific in 1768, a third of the globe remained blank. By the time he died in Hawaii in 1779, the map

of the world was substantially complete. Tony Horwitz, author of *Confederates in the Attic*, vividly recounts Cook ' s voyages and the exotic scenes the captain encountered: tropical orgies, taboo rituals, cannibal feasts, human sacrifice. He also relives Cook ' s adventures by following in his wake to places such as Tahiti, Savage Island, and the Great Barrier Reef to discover Cook ' s embattled legacy in the present day. Signing on as a working crewman aboard a replica of Cook ' s vessel, Horwitz experiences the thrill and terror of sailing a tall ship. He also explores Cook the man: an impoverished farm boy who broke through the barriers of his class and time to become the greatest navigator in British history, whose voyages helped create the “ global village ” we know today. “ With healthy doses of both humor and provocative information, the book will please fans of history, exploration, travelogues and, of course, top-notch storytelling. ” —Publishers Weekly “ Horwitz retells the sailor ' s story and tries to re-create first contact from the point of view of the locals—Tahitians, Maoris, Aleuts, Hawaiians, and others—and judge the legacy of his landing . . . thought-provoking . . . brims with insight. ” —Booklist “ A rollicking read that is also a sneaky work of scholarship . . . new and unexpected insights into the man who out-

discovered Columbus. A terrific book. ” —Nathaniel Philbrick, National Book Award winner and New York Times – bestselling author of *In the Heart of the Sea* “ Well-researched, gripping, and peppered with humorous passages. ” —St. Louis Post-Dispatch “ Part Cook biography, part travelogue, and very much a stroke of genius. ” —Philadelphia Inquirer

Automotive Engines: Theory and Servicing, 5/e (With CD)

Early in 1892, one of Norway's finest boat builders launched a sailing legend. Over 100 years later Shane Granger and Meggi Macoun were peacefully enjoying a siesta when the great tsunami of 2004 changed their lives forever. With thousands of people desperately in need, they loaded their boat with donated food and medical supplies then set sail for Sumatra. That voyage was the beginning of a rip-roaring real life sea tale complete with storms, adventures, exotic tropical islands, and heart-rending drama. Come feel the wind, smell the riggers tar, and taste the salt in this tale of a century old wooden sailing boat and her crew of intrepid adventurers as they take up their yearly 7,500-mile journey to deliver over 25 tons of educational and medical supplies to some of our world's most remote island communities. About the Author SHANE GRANGER (1948 - until his luck runs out) has been

in love with the sea since he was seven years old. Having worked as a radio DJ, advertising photographer, boat builder, director of museum ship restoration, and bush pilot, he has always come back to the sea. Shane has sailed thousands of miles solo, most of that on a square-rigged brigantine he salvaged from a beach in West Africa - a vessel he once single-handedly sailed across the Atlantic without a functioning rudder. After walking across the Sahara Desert, and being kidnapped by bandits in Afghanistan, his greatest ambition in life is to find a comfortable niche where he can enjoy the healthy benefits of monotony and boredom. He currently lives on an ancient wooden sailing boat with his partner Meggi Macoun and their cat Scourge.

Blue Latitudes

This book examines key aspects of the increasingly important phenomenon of reshoring – the decision of companies to reverse offshoring by bringing manufacturing back from overseas. The aim is to equip readers with a full understanding of the current extent of reshoring, its drivers, and the associated opportunities and challenges. The impact of governments' economic policies on the location choices of entrepreneurs in an era of globalization is carefully analyzed, drawing on experiences in the United States and Italy, where

contrasting encouragement is provided for reshoring decisions. The effect on reshoring of recent developments regarding technology, the environment, and other factors is assessed in depth, and readers will also find close scrutiny of the relationship between reshoring and manufacturing performance. The book will be of interest to all academics, researchers, and practitioners with an interest in the manufacturing industry and will be an excellent teaching aid for a variety of courses in different disciplines at both undergraduate and postgraduate level.

Automotive Service

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. *Advanced Automotive Fault Diagnosis* is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and

NVQs; Level 4 diagnostic units;
BTEC National and Higher
National qualifications from
Edexcel; International Motor
Vehicle qualifications such as C&G
3905; and ASE certification in the
USA.
