Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

The Fair Labor Standards Act Chronicle Books

In the second edition of *Labor-Based Grading Contracts*, Asao B. Inoue refines his exploration of labor-based grading contracts in the writing classroom. Drawing on antiracist teaching practices, he argues that labor-

based grading contracts offer a compassionate approach that is strongly grounded in social justice work. Updated with a new foreword and revised chapters, the book offers a meditation on how Inoue's use of Freirean problem-posing led him to experiment with grading contracts. The result is a robust Marxian theory of labor that considers Hannah Arendt's theory of labor-work-action and Barbara Adam's concept of "timescapes." The heart of the book details the theoretical and practical ways labor-based grading contracts can be used and assessed for effectiveness in classrooms and programs. Inoue concludes his exploration of labor-based grading by moving outside the classroom, considering how assessing writing in the socially just ways he offers in the book may provide a way to address the violence and discord seen in the world today.
