The Air Force Aircrew Flight Equipment (AFE) specialty plays a crucial role in ensuring the safety of airmen. The authors investigate causes for the decline in AFE proficiency and develop courses of action to mitigate the issue.

Volume 1 John Wiley & Sons

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Making Home(s) in Displacement critically rethinks the relationship between home and displacement from a spatial, material, and architectural perspective. Recent scholarship in the social sciences has investigated how migrants and refugees create and reproduce home under new conditions, thereby unpacking the seemingly contradictory positions of making a home and overcoming its loss. Yet, making home(s) in displacement is also a spatial practice, one which intrinsically relates to the fabrication of the built environment worldwide. Conceptually the book is divided along four spatial sites, referred to as camp, shelter, city, and house, which are approached with a multitude of perspectives ranging from urban planning and architecture to anthropology, geography, philosophy, gender studies, and urban history, all with a common focus on space and spatiality. By articulating everyday homemaking experiences of migrants and refugees as spatial practices in a variety of geopolitical and historical contexts, this edited volume adds a novel perspective to the existing interdisciplinary scholarship at the intersection of home and displacement. It equally intends to broaden the canon of architectural histories and theories by including migrants' and refugees' spatial agencies and place-making practices to its annals. By highlighting the political in the spatial, and vice versa, this volume sets out to decentralise and decolonise current definitions of home and displacement, striving for a more pluralistic outlook on the idea of home.

an evidence-informed approach Springer Nature

Examining the effects of the Cold War and regional politics on the Iraqi Kurds between 1958 and 1975, this study demonstrates how regional and international powers sought to exploit the Iraqi Kurds in their quest for statehood. The research draws on a plethora of British and American archival documents and select Soviet and Iranian sources integrated with Kurdish authoritative and eyewitness accounts. The work explores the Iraqi Kurds on three levels: Firstly, on a national Iraqi level, starting with the Iraqi Revolution in 1958 to the collapse of the Kurds' liberation movement in 1975 under Mela Mustafa Barzani. Secondly, it considers the issue on a regional level by examining the political dynamics between Iran (under the Shah), Iraq, Egypt (thus Nasserists) and other

regional states, with a focus on these states' relations and tensions. Thirdly, it scrutinises the impact of the Cold War on the politics and history of Iraq, focussing on the effects on the Kurds in particular. Complementing the existing literature, this volume builds a chronological narrative through historical analysis. It is a key resource for students, scholars, policymakers and regional experts interested in Kurdish history, foreign policy, politics and security in the Middle East.

Describes a new theory of nursing as caring and caring as a way of nurses living in the world. This theory provides a view that can be lived in all nursing situations and can be practiced alone or in combination with other theories. Illustrates the practical meaning of the theory in a range of nursing situations, discusses nursing service administration from the perspective of the theory, and offers strategies for transforming nursing education based on nursing as caring. Boykin is dean and professor at the Christine E. Lynn Center for Caring, College of Nursing, Florida Atlantic University. Schoenhofer teaches graduate nursing at Alcorn State University. c. Book News Inc.

Increasing Aircrew Flight Equipment Personnel Proficiency Milady Publishing Company

This topic is a unique attempt to simultaneously tackle theoretical and practical aspects in drought phenotyping, through both crop-specific and cross-cutting approaches. It is designed for – and will be of use to – practitioners and postgraduate students in plant science, who are grappling with the challenging task of evaluating germplasm performance under different water regimes. In Part I, different methodologies are presented for accurately characterising environmental conditions, implementing trials, and capturing and analysing the information this generates, regardless of the crop. Part II presents the state-of-art in research on adaptation to drought, and recommends specific protocols to measure different traits in major food crops (focusing on particular cereals, legumes and clonal crops). The topic is part of the CGIAR Generation Challenge Programme's efforts to disseminate crop research information, tools and protocols, for improving characterisation of environments and phenotyping conditions. The goal is to enhance expertise in testing locations, and to stimulate the development and use of traits related to drought tolerance, as well as innovative protocols for crop characterisation and breeding.

This revised edition of An Introductory Guide to Massage is an accessible reference for students studying towards qualifications in Body and Holistic massage and provides the underpinning knowledge and skills needed for successful massage treatments. The classical techniques that form the basis of most systems are thoroughly explained, and the student is introduced to the different types of massage commonly offered by complementary, spa and sports therapists. This practical reference also has detailed sections on preparing for treatments, consulting with clients and record keeping, together with an overview of other therapies that are compatible with massage.

The Foundations Jones & Bartlett Learning

The book brings together research topics having a broad focus on human and climate change impacts on the terrestrial ecosystems in the tropics in general and more specifically from the most significant and vulnerable Himalayan ecosystem. A total of 16 contributions included in the book cover a diverse range of global change themes such as the impacts of changing temperature and precipitation on soil ecosystems, forest degradation, extent and impacts of invasive species, plant responses to pollution, climate change impacts on biodiversity and tree phenology, environmental changes associated with land use, importance of traditional knowledge in climate change adaptation, timberline ecosystems, and role of integrated landscape modeling for sustainable management of natural resources. The book is a collective endeavour of an international multidisciplinary group of scientists focused on improving our understanding of the impacts of global change on the structure and functioning of tropical ecosystems and addressing the challenges of their future sustainable management. We hope that the book will help researchers working in the areas of ecology and environmental science to update their knowledge. We also expect that natural resource managers and policy planners will find explanations for some of their observations and hypotheses on multiple global change factors impacting tropical ecosystems and especially Himalayan ecosystems.

Drought phenotyping in crops: From theory to practice Adams Media

BEST IN BEAUTY is the most complete guide to beauty products,

tools, and makeup techniques, based on interviews with top beauty experts: skin care gurus, hair stylists, manicurists, eyebrow specialists, and a nutritionist. More than one hundred amazingly beautiful photographs of makeup, done by Riku, will show step by step how to create each and every look for your face. This comprehensive guide offers the star treatment from experts such as skin care specialist Ole Henriksen, nutritionist Debra Santelli, spa director Donna Shoemaker, manicurist Beth Fricke, hairstylist Kevin Woon, and more.

Nursing as Caring McGraw-Hill Europe

The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, including the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitioners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and well-being. This book provides educators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a usable way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly reviewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in practice standards and licensure.

Theory and Practice of Therapeutic Massage, 5th edition is the classic text in the massage industry including the essential knowledge and skills needed to become a successful, professional massage therapist, plus the essentials of anatomy and physiology. Essential topics to the industry such as ethics, hygiene, communication skills, and body mechanics are discussed. Full-color illustrations and photographs clearly illustrate techniques and procedures. Classical massage is expanded with clinical techniques including neuromuscular and myofascial techniques, and lymph massage, combined to better serve the client by following therapeutic procedures. Numerous career tracts are explored including massage in a spa environment and athletic massage. A new chapter discusses massage for special populations including pre-natal, infant, elder, critically ill, people with cancer, and hospice. The final chapter has been revised to cover business practices for finding employment or successful self-employment. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Official Guide to Level 3 Cambridge University Press

Revised and updated, with a new page layout, this edition contains material on facial cosmetics and treatments, skin diagnosis, new products, guidance on the selling role of beauty therapists, and expanded use of tables and charts for skin conditions and products. Exercises and questions are included.

Introduction to Information Retrieval Simon and Schuster

Unlike any other MIS textbook franchise, our Baltzan texts (Business Driven Technology, Business Driven Information Systems and M: Information Systems) discuss various business initiatives first and how technology supports those initiatives second. The premise for this unique approach is that business initiatives should drive technology choices. Every discussion in these texts first addresses the business needs and then addresses the technology that supports those needs. Business Driven Technology5e offers you the flexibility to customize your course according to your needs and the needs of your students by covering only essential concepts and topics in the five core units, while providing additional in-depth coverage in the business and technology plug-ins. This

text contains 20 chapters, 20 business plug-ins, and 12 technology plug-ins offering you the ultimate flexibility in tailoring content to the exact needs of your MIS or IT course. The unique construction of this text allows you to cover essential concepts and topics in the five core units while providing you with the ability to customize a course and explore certain topics in greater detail with the business and technology plug-ins. Plug-ins are fully developed modules of text that include student learning outcomes, case studies, business vignettes, and end-of-chapter material such as key terms, individual and group questions and projects, and case study exercises. We realize that instructors today require the ability to cover a blended mix of topics in their courses. While some instructors like to focus on networks and infrastructure throughout their course, others choose to focus on ethics and security. Business Driven Technology was developed to easily adapt to your needs. Each chapter and plug-in is independent so you can: *Cover any or all of the chapters as they suit your purpose. *Cover any or all of the business plug-ins as they suit your purpose. *Cover any or all of the technology plug-ins as they suit your purpose. *Cover the plug-ins in any order you wish. Baltzan, Business Driven Technology 5e: Engaging * Flexible * 100% Supported
