ITIL 4 Service Design. The Service Design processes described here follow the specifications of ITIL V3, where Service Design is the second stage in the Service Lifecycle. ITIL V4 has moved from the Service Lifecycle concept to a more holistic approach that includes key concepts, the Four Dimensions Model and the Service Value System (SVS)

Details The 2011 Editions have been updated to

improve consistency, aid in navigation and improve readability. Service Design provides guidance on the production and maintenance of IT policies, architectures, and documents for the design of appropriate and innovative IT infrastructure service solutions and processes.

Roles, interfaces, inputs and outputs have been harmonized within the five publications, errors and inconsistencies in text and graphics have been removed. Hence the edition 2011 is more easy to read, control, translate, implement and communicate. The ITIL® 2011 edition is available in English printing since the end of July 2011.

*ITIL Service Design | IT Process Wiki*

In ITIL 2011 the process interfaces of all Service Design processes have been adapted following the introduction of the new Design Coordination process. Design Coordination. Design Coordination has been added as a new process, in line with the latest ITIL 2011

---

guidance. Design Coordination is now responsible for coordinating the design activities carried out by other Service Design processes.
