A bold account of the development of human consciousness and spirituality over the ages and an examination of the dynamic global transformation of attitudes about healing. For more than fifteen years, Caroline Myss has studied why some people heal, while others do not. In her previous book, *Anatomy of the Spirit*, Dr. Myss illuminated the hidden interactions of belief and body, soul and cell to show how, as she inimitably puts it, "your biography becomes your biology." In *Why People Don't Heal and How They Can*, she builds on her earlier teachings of the seven different energy centers of the body to provide a vital self-healing program for physical and

spiritual disorders. With her characteristic no-nonsense style and high-voltage storytelling, she exposes and explodes the five myths about healing, explains the cultural and individual contexts in which people become physically and spiritually ill and invested in "woundology," and teaches new methods of working with the challenges that the seven energy centers embody. To help you get and stay on the path to wellness, Dr. Myss provides rituals and prayers for gaining a symbolic perspective on your life issues; for bolstering your personal power; and for connecting with a universal divine energy. Dr. Myss's breakthrough views on energy medicine and her active approach to healing life issues and physical illness will help you overcome the mental blocks that keep you from becoming well.

Fiction it has been suggested is stranger than history, but the reality is fiction is history. It is either a record of an author's stimulated imagination, or real events of historical merit with venues, names and dates skewed to protect the innocent. The former being the case for The Balanga Complex A Pilgrim's Holiday. That is, mostly the case for life experiences can never be totally eliminated from a fictional story. To live is to have a story whether rooted in imagination or accrued from actual happenings. Both being the case for the author of this holiday story and that makes for a more familiar, if not a truer fictional tale.

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. **START WITH WHY** asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. **START WITH WHY** shows that the leaders who have had the greatest influence in the world all think, act and

communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

Keeping students focused can be difficult in a world filled with distractions -- which is why a renowned educator created a scientific solution to one of every teacher's biggest problems. Why is it so hard to get students to pay attention? Conventional wisdom blames

iPhones, insisting that access to technology has ruined students' ability to focus. The logical response is to ban electronics in class. But acclaimed educator James M. Lang argues that this solution obscures a deeper problem: how we teach is often at odds with how students learn. Classrooms are designed to force students into long periods of intense focus, but emerging science reveals that the brain is wired for distraction. We learn best when able to actively seek and synthesize new information. In *Distracted*, Lang rethinks the practice of teaching, revealing how educators can structure their classrooms less as distraction-free zones and more as environments where they can actively cultivate their students' attention. Brimming with ideas and grounded in new research, *Distracted* offers an innovative plan for the most important lesson of all: how to learn.

There is an enigmatic quality about the number seven that transcends time and culture. It can symbolize luck - or represent an ominous warning. So it was in the time of the Roman Empire in the first century. For the citizens of Pompeii, it was the end of life as they knew it, and nothing would ever be the same again after the seventh month of AD 79. The first of July reunites an ancient dysfunctional family at their sumptuous new villa in the shadow of Vesuvius. The daughter is desperate to avoid her father's intentions to arrange her marriage. She is romantic, longing to experience the emotions described by her favored poets. The only child of a first marriage, she suffers guilt over her mother's death in childbirth. Every bit the gilded age debutante of another era, she finds herself tempted by feelings for someone most unsuitable. Her brother is an arrogant dandy with a passion for the games, whose indulgent excesses are cries for attention, his ambition fueled by massive gambling debts. Their father is a veteran of the Britannic campaigns. Aggressive to build his own empire, he ruthlessly married two women for their

fortunes, but secretly prefers his relations with men. The last 18 years have been devoted to cultivating his business instead of his family, and he is a rich man. With the death of the Emperor, he fears time is running out to form his legacy. His second wife, sixteen years his junior, is struggling to cope with the insecurity of her position in life, and her dependence on alcohol. She relieves her hatred of men and sexual tensions by purchasing the services of the infamous. As July passes the harmony of the family is disturbed by the presence of a Greek slave, an artist commissioned to paint the murals adorning the villa. Possessed with the gift of prophecy from the Oracle of Delphi, he foretells an imminent warning, 'the end of seven'. What does it mean? Was it a matter of destiny or fate? The rhetorical argument intrigues the Romans. Their world shakes with tremors and begins to fall apart as the eighth months unfolds. Who will heed the warning before the volcano erupts suddenly on August 24th? Who will live - and who will die... The End of Seven is an historical novel that portrays the evocative opulence of the pagan world in a time of moral ambiguity and diverse wealth. The catastrophic destruction of Pompeii has intrigued generations since its' discovery. Here is a story with characters so compelling, so vivid, the reader will not want

to put the book down to leave their world.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the

world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop:

Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

It's Not Complicated! is addressed to fathers, mothers, children, and those desiring to marry and become fathers and mothers who will raise, train, and discipline their children (especially boys) to be mature—not placeholders, but healthy, responsible, and independent citizens who are not looking for an easy way out, but rather are seeking God's plan for the prosperity (economic, physical, mental, emotional, and spiritual well-being) of their family. The history of the world will tell us

just how destructive it is to have people out of place (especially in a family). In other words, the family unit is continuing to break down while the mother and/or father is blaming the other for the destruction they see, instead of taking responsibility to ensure their children are healed of the wounds often caused by the ignorance of the parent(s). God has a plan for man (male and female), the family, and the society. "For I know the plans I have for you, declares the Lord, plans for welfare (peace) and not for evil, to give you a future and a hope" (Jeremiah 29:11, ESV). Until we do it his way, devastation and death will continue to occur in our homes and communities because of the ignorance we perpetuate when we hear disrespectful words and see disrespectful behavior emanating from our children, youth, and young adults. No society can continue its existence without the male assuming his God-given, God-ordained responsibility to provide leadership for his family in a God-honoring, grace-filled manner that's motivated by love. Without proper instruction and encouragement, we cannot continue as a healthy people or a sound healthy community.
