'e-Business: a jargon-free practical guide' presents a clear, second-generation account of how your business can harness the latest technology to flourish in the transformed commercial climate of the 21st century. With its emphasis firmly on the business and marketing implications of new technology, this book adopts a hands-on, practical approach, systematically demonstrating how and why businesses should adapt their operations to make the very most of the exciting opportunities available. In simple, jargon-free language, it addresses such vital questions as: * What is e-business and how does it fit into the corporate landscape? * How should marketers adopt e-marketing and why? * What are the processes and stages of developing an e-business strategy? * What are the key issues you will face and how will you overcome them? * What about legislation? * Who is doing e-marketing and e-business well and badly? 'e-Business' is packed with case-studies from well-known international companies, examples, screen grabs, relevant models and checklists. Each chapter meanwhile contains handy hints and tips, examples, exercises and a summary to consolidate learning and highlight key points. Informative, pertinent and easy-to-use, the book is ideal for students on relevant courses or those undertaking in-house training, and is absolutely essential for any practitioner needing a hands-on guide to strategy and best practice in today's altered commercial environment.

World Guide to Television Juris Publishing, Inc.

Doris Day, once called an Actors Studio unto herself, was one of the twentieth century 's greatest entertainers, with a career spanning 39 films, more than 150 television shows, and more than 500 recordings. This work covers the life and career of the singer and star of such films as *Pillow Talk*, *The Man Who Knew Too Much* and *Calamity Jane*. The work is divided into four sections, beginning with a biography of Day ' s life from her birth in Cincinnati, Ohio, through four marriages, near-bankruptcy, and her dedication to animal rights, and concluding with her contented present life. A filmography lists each film with full credits, synopsis and reviews, plus her popularity rankings and awards. The third section lists complete record album releases with notes, single record releases, unreleased songs and recordings, music awards and nominations, radio appearances from big bands to solo work, her seven million-sellers, and chart placements. The final section lists Day ' s television appearances, including synopses and credits for her five-season run with *The Doris Day Show* on CBS, the cable show *Doris Day ' s Best Friends*, and her appearances in variety specials, talk shows, and documentaries.

European Commission Decisions on Competition Know it All, Find it Fast for Youth Librarians and Teachers

European Commission Decisions on Competition provides a comprehensive economic classification and analysis of all European Commission decisions adopted pursuant to Articles 101, 102 and 106 of the FEU Treaty from 1962 to 2009. It also includes a sample of landmark European merger cases. The decisions are organised according to the principal economic theory applied in the case. For each economic category, the seminal Commission decision that became a reference point for that type of anticompetitive behaviour is described. For this, a fixed template format is used throughout the book. All subsequent decisions in which the same economic principle was applied are listed chronologically. It complements the most widely used textbooks in industrial organisation, competition economics and competition law, to which detailed references are offered. The book contains source material for teachers and students, scholars of competition law and economics, as well as practising competition lawyers and officials.

Consumers can make choices because of the differentiation that is preserved by intellectual property. Competition law informs intellectual property, generally with the intent of ensuring that it achieves this main purpose. However, very often, certain public policies relating to competition interfere with the way intellectual property should normally operate, either with the purpose of reinforcing its differentiating role, or with the objective of submitting it to other public goals – such as access to essential goods and services, or in recognition of situations where a given invention becomes part of a technical standard or is deemed dangerous to health or the environment. This book presents eighty cases that interpret the various public policies that mould the interface of intellectual property law with competition law (or antitrust). Although most cases are from the United States - which has developed an enormously wide wealth of jurisprudence in this area - there are also cases from the European Union, the United Kingdom, Australia, Canada, South Africa, Brazil, South Korea, India, and Argentina. The author presents the cases under the following general headings: • setting the right dosage (i.e., avoiding too much or too little intellectual property); • setting the standards of differentiation; • refusing to license intellectual property; • licensing (and assigning) intellectual property; • enforcing intellectual property rights; • remedies; • intellectual property in sectors of special public interest; and • technical standards. Revealing in extraordinary depth the tensions behind the values of the free market which intellectual property serves and the variety of responses these tensions provoke, this book may be regarded as a watershed resource regarding the principles and policies that, sometimes coherently, sometimes not, preside over the very complex relationship between intellectual property and antitrust. It is sure to be greatly valued by all professionals in both fields, from practitioners to policymakers, as well as by academics.

Competition Law of the EU and UK Apress

This volume contains articles and panel discussions delivered during the Thirty-Ninth Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. The chapters are revised and updated before publication, where necessary. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.

Technology is meant to make life easier and to raise its quality. Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology. Even so, technology may change quickly and people and their habits change slowly. With the aim of supporting user acceptance of iTV, the focus of this book is on the usability of iTV applications. A method for developing interaction design patterns especially for new technologies is presented for the first time. The main characteristics covered in this new approach are: systematic identification of recurrent design problems; usability as a quality criterion for design solutions; integration of designers into the pattern development process including identification of designers' needs, and iterative evaluation and optimisation of patterns to encourage designers to accept and use them; usability testing to identify proven design solutions and their trade-offs; presentation of specific design guidelines.
