Collected interviews featuring the Nebula Award-winning author and his thoughts on topics like literary criticism, comic books, race, and sexuality. For nearly three decades, Samuel R. Delany's science fiction has transported millions of readers to the fringes of time, technology, and outer space. Now Delany surveys the realms of his own experience as a writer, critic, theorist, and gay Black man in this collection of written interviews, a type of guided essay. Because the written

interview avoids the "mutual presence positioned at the semantic core" of traditional interview, Delany explains, "a kind of cut remains between the participants—a fissure in which the truths there may be more malleable, less rigid." Within that fissure Delany pursues the breadth and depth of his ideas on language and theory, the politics of literary composition, the experience of marginality, and the philosophical, commercial, and personal contexts of writing today. Gathered from sources as diverse as *Diacritics* and *The Comics Journal*, these interviews

reveal the broad range of Delany's thought and interests. "Delany has a unique place in late twentieth century letters. A lifelong inhabitant of the margins, both social and literary, he has used his marginalized status as a lens to focus his astute observations of American literature and society. From these interviews his voice emerges, provocative, precise, and engaging." —Kathleen Spencer, University of Nebraska

"Samuel R. Delany never shies away from contestable positions or provocative opinions. In his fiction, Delany can write like quicksilver, and in lectures or panel discussions, he is easily SF's most articulate spokesperson in academia. . . . There is much here that is not covered in Delany's critical or autobiographical writings, and much that anyone seriously interested in SF—or many of Delany's other favorite topics—ought to consider." —Locus "Delany is fascinating whether discussing SF, comics, or his experiences as a Black American, and this collection . . . is as entertaining as it is informative." —Science Fiction Chronicle "Yevgeny Zamyatin? Stanislaw Lem? Forget it! Delany is both, with a lot of Borges

and Bruno Schultz thrown in."

When it was published in 1932, this revolutionary first fiction redefined the art of the novel with its black humor, its nihilism, and its irreverent, explosive writing style, and made Louis-Ferdinand Celine one of France's--and literature's--most important 20th-century writers. The picaresque adventures of Bardamu, the sarcastic and brilliant antihero of *Journey to the End of the Night* move from the battlefields of World War I (complete with buffoonish officers and cowardly soldiers), to French West Africa, the United States, and back to France in a style of prose that's lyrical, hallucinatory, and hilariously scathing toward nearly everybody and everything. Yet, beneath it all one can detect a gentle core of idealism.

"Marvelous . . . [Vonnegut] wheels out all the complaints about America and makes them seem fresh, funny, outrageous, hateful and lovable."—The New York Times In *Breakfast of Champions*, one of Kurt Vonnegut's most beloved characters, the

aging writer Kilgore Trout, finds to his horror that a Midwest car dealer is taking his fiction as truth. What follows is murderously funny satire, as Vonnegut looks at war, sex, racism, success, politics, and pollution in America and reminds us how to see the truth. “Free-wheeling, wild and great . . . uniquely Vonnegut.”—Publishers Weekly

The bestselling cyberpunk author “has produced by far the most stylish report from the computer outlaw culture since Steven Levy’s *Hackers*” (Publishers Weekly). Bruce Sterling delves into the world of high-tech crime and punishment in one of the first books to explore the cyberspace breaches that threaten national security. From the crash of AT&T’s long-distance switching system to corporate cyberattacks, he investigates government and law enforcement efforts to break the back of America’s electronic underground in the 1990s. In this modern classic, “Sterling makes the hackers—who live in the ether between terminals under noms de net such as VaxCat—as vivid as Wyatt Earp and Doc Holliday. His book goes a long way towards explaining the emerging digital world and its ethos” (Publishers Weekly). This edition features a new preface by the author that analyzes the sobering increase in computer crime over the twenty-five years since *The Hacker Crackdown* was first published. “Offbeat and brilliant.” —Booklist

“Thoroughly researched, this account of the government’s crackdown on the nebulous but growing computer-underground provides a thoughtful report on the laws and rights being defined on the virtual frontier of cyberspace. . . . An enjoyable, informative, and (as the first mainstream treatment of the subject) potentially important book . . . Sterling is a fine and knowledgeable guide to this strange new world.” —Kirkus Reviews

“A well-balanced look at this new group of civil libertarians. Written with humor and intelligence, this book is highly recommended.” —Library Journal

In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth

and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

At the age of ten, when Martin Amis spent a year in Princeton, New Jersey, he was excited and frightened by America. As an adult he has approached that confusing country from many arresting angles, and interviewed its literati, filmmakers, thinkers, opinion makers, leaders and crackpots with characteristic discernment and wit. Included in a gallery of Great American Novelists are Norman Mailer, Gore Vidal, Truman Capote, Joseph Heller, William Burroughs, Kurt Vonnegut, John Updike, Paul Theroux, Philip Roth and Saul Bellow. Amis also takes us to Dallas, where presidential candidate Ronald Reagan is attempting

to liaise with born-again Christians. We glimpse the others.

Steven Spielberg gets a visit, as does Brian de Palma, whom Amis asks why his films make no sense, and Hugh Hefner's sybaritic fortress and sanitised image are penetrated. There can be little that escapes the eye of Martin Amis when his curiosity leads him to a subject, and America has found in him a superlative chronicler.

On one side of the argument is a collection of godless academics with doctorates from the finest universities in England, France, and the United States. On the other is Irrational Atheist author Vox Day, armed with nothing more than historical and statistical facts. Presenting a compelling argument (but not for the side one might expect), Day strips away the pseudo-scientific pretensions of New Atheism with his intelligent application of logic, history, military science, political economy, and well-documented research. The arguments of Richard Dawkins, Sam Harris, Christopher Hitchens, Daniel Dennett, and Michel Onfray are all methodically exposed and discredited as Day provides extensive evidence proving, among other things, that: More than 93 percent of all the wars in human history had no relation to religion The Spanish Inquisition had no jurisdiction over

professing Jews, Muslims, or atheists, and executed fewer people on an annual basis than the state of Texas Atheists are 3.84 times more likely to be imprisoned than Christians "Red" state crime is primarily in "blue" counties Sexually abused girls are 55 times more likely to commit suicide than girls raised Catholic In the twentieth century, atheistic regimes killed three times more people in peacetime than those killed in all the wars and individual crimes combined. The Irrational Atheist provides the rational thinker with empirical proof that atheism's claims against religion are unfounded in logic, fact, and science.
