Creating Small Scale Social Programs University of Chicago Press

Renowned American sociologist William Julius Wilson takes a look at the social transformation of inner city ghettos, offering a sharp evaluation of the convergence of

race and poverty. Rejecting both conservative and liberal interpretations of life in the inner city, Wilson offers essential information and a number of solutions to policymakers. The Truly Disadvantaged is a wide-ranging examination, looking at the relationship between race, employment, and education from the 1950s onwards, with surprising and provocative findings. This second edition also includes a new afterword from Wilson himself that brings the book up to date and offers fresh insight into its findings. “ The Truly Disadvantaged should spur critical thinking in many quarters about the causes and possible remedies for inner city poverty. As policymakers grapple with the problems of an enlarged underclass they—as well as community leaders and all concerned Americans of all

ances—would be advised to examine Mr. Wilson's incisive analysis.” —Robert Greenstein, New York Times Book Review

Who Decides the Budget? Elsevier Health Sciences

This project, based on the Public Expenditure and Financial Accountability (PEFA) data set, researched how PEFA can be used to shape policy development in public financial management (PFM) and other major relevant policy areas such as anticorruption, revenue mobilization, political economy analysis, and fragile states. The report explores what shapes the PFM system in low- and middle-income countries by examining the relationship between political institutions and the quality of the PFM system. Although the report finds some evidence that multiple political parties in control of the legislature is associated with better PFM performance, the report finds the need to further refine and test the theories on the relationship between political institutions and PFM. The report addresses the question of the outcomes of PFM systems, distinguishing between fragile and nonfragile states. It finds that better PFM performance is associated with more reliable budgets in terms of expenditure composition in fragile states, but not aggregate budget credibility. Moreover, in contrast to existing studies, it finds no

evidence that PFM quality matters for deficit and debt ratios, irrespective of whether a country is fragile or not. The report also explores the relationship between perceptions of corruption and PFM performance. It finds strong evidence of a relationship between better PFM performance and improvements in perceptions of corruption. It also finds that PFM reforms associated with better controls have a stronger relationship with improvements in perceptions of corruption compared to PFM reforms associated with more transparency. The last chapter looks at the relationship between PEFA indicators for revenue administration and domestic resource mobilization. It focuses on the credible use of penalties for noncompliance as a proxy for the type of political commitment required to improve tax performance. The analysis shows that countries that credibly enforce penalties for noncompliance collect more taxes on average.

In their groundbreaking book, authors Jeremy Hope and Robin Fraser show how organizations can break free from the annual budget trap once and for all. Beyond Budgeting is not a new financial-planning process - it is an alternative, coherent management model that enables companies to manage performance through processes specifically tailored to today's volatile marketplace. Hope and Fraser spent five years studying a wide range of international companies - from a global corporation to a small charity, from a bank to a ball-bearings manufacturer - that have already abandoned traditional budgeting to varying degrees. From these pioneering experiences, the authors have distilled a set of guiding principles that will take any company beyond budgeting to a whole new level of competitiveness. Based on the decision-making needs of front-line managers, Beyond Budgeting enables readers to take advantage of two major opportunities: 1) a set of adaptive management processes that

replace centrally controlled, predetermined goals with self-regulating, relative competitive benchmarks, and 2) the transfer of power and decision-making authority from the center of the organization to the front line.

Did you know that the average American teenager spends nearly \$3,000 a year? Sounds like a lot, doesn't it? But with money gifts from birthday and Christmas, allowances, and part-time jobs, teenagers have gained purchasing power in this country. But when you turn 20, will you know where that \$21,000 went? We like to have money, save money, and especially spend money, but few people put learning about money at the top of their priority list. As a teen, maybe you don't feel that you have enough money to worry about it, but even though you don't have much, you have enough to matter-especially to the people that sell products for teens! Don't get caught in the web

of marketing gurus. Take control of your money, so no one else will. In the Money Matters Workbook for Teens, Larry Burkett and Todd Temple will show teens how to: Pay fair price for quality items Avoid being ripped off by misleading ads and salespeople Stay out of debt Save for a car, college, your own business Give money away that will make a difference in the world Save money to do fun things with your friends Learn skills that will help you right now, and prepare for a successful financial future

The Great Escape for the Great War: the astonishing true story of two World War I prisoners who pulled off one of the most ingenious escapes of all time. FINALIST FOR THE EDGAR® AWARD • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST AND NPR • “ Fox unspools Jones and Hill ’ s delightfully elaborate scheme in nail-biting episodes that advance like a narrative Rube Goldberg machine. ” —The New York Times Book Review Imprisoned in a remote Turkish POW camp during World War I, having survived a two-month forced march and a terrifying shootout in the desert, two British officers, Harry Jones and Cedric Hill, join forces to bamboozle their iron-fisted captors. To stave off despair and boredom, Jones takes a handmade Ouija board and fakes elaborate séances for his fellow prisoners. Word gets around, and one day an Ottoman official approaches Jones with a query: Could Jones contact the spirit world to

find a vast treasure rumored to be buried nearby? Jones, a trained lawyer, and Hill, a brilliant magician, use the Ouija board—and their keen understanding of the psychology of deception—to build a trap for their captors that will ultimately lead them to freedom. A gripping nonfiction thriller, *The Confidence Men* is the story of one of the only known con games played for a good cause—and of a profound but unlikely friendship. Had it not been for “ the Great War, ” Jones, the Oxford-educated son of a British lord, and Hill, a mechanic on an Australian sheep ranch, would never have met. But in pain, loneliness, hunger, and isolation, they formed a powerful emotional and intellectual alliance that saved both of their lives. Margalit Fox brings her “ nose for interesting facts, the ability to construct a taut narrative arc, and a Dickens-level gift for concisely conveying personality ” (Kathryn Schulz, New York) to this tale of psychological strategy that is rife with cunning, danger, and moments of high farce that rival anything in *Catch-22*.

There is a void in the literature on how to conduct research in the finance and economics of higher education. Students, professors, and practitioners have no concise document that examines the field, provides history, definitions of terms, sources of data, and research methods. Higher Education Finance Research: Policy, Politics, and Practice fills that void. The book is structured in four parts. The first section provides a brief history and description of the general organization of American higher education, the sources and uses of funds over the last 100 years, and who is served in what types of institutions. Definitions of terms that are unique to higher education are provided, and some basic rules for conducting research on the economics and finance of higher education are established. Although in some ways, conducting research in higher education funding is similar to that for elementary/secondary education, there are some important distinctions that also are provided. The second section introduces guiding philosophies, sources of data, data elements/vocabulary, metrics, and analytics related to institutional revenues and expenditures. Chapters in this section focus on student oriented revenues, institutionally-oriented revenues, and funding formulas. The third section introduces accountability-related concepts by first examining the accountability movement in higher education and performance-based approaches applied in budgeting and funding, then looking at methods to determine public and private returns on investment in postsecondary education, and closing with an examination of finance

from the perspective of the primary consumer: students. The fourth and last section of the book focuses on presenting postsecondary finance research to policy audiences to assist in connecting academic research and policy making. Chapters focus on accounting for time considerations in analysis, the placing of data in context to make the data and findings relevant, and ways to effectively communicate findings to various policy-making audiences.
