Jabiru 2200 / 3300 discussions. 10 posts • Page 1 of 1. Jabiru 3300 Overheating. by buffmaintainer » Fri Jul 31, 2020 9:03 pm . Hey guys, I'm trying to figure out the engine overheat issue that blew up my old engine. I noticed cylinder no.5 got very hot on the ground, (398F) and once in the air slowly cooled down.

subsequent airworthiness of the Jabiru engine. The ATSB report AR-2013-107 (Attachment 1) provides a good breakdown of the pertinent data. Figure 9 on page 18 of that report clearly shows that, if these two primary failures can be controlled, the reliability of the Jabiru engine would be

Jabiru Engine Reliability

Thanks guys. I've been flying with the Jabiru 2200 for several years now so have quite a bit of experience with them. However my engines have been early hydraulics. I placed an order for a new 2200 so am hoping that they've ironed out the common issues. Fingers crossed!! But if anyone knows anyone with the latest engine, let me know.

Jabiru 3300 - Wikipedia

There seem to be a number of posts on the Yahoo Jabiru and CAMIT newsgroup about mechanical fuel pump failures on CAMIT engines (both 3300 and 2200). It seems that problems have occurred on a number of new engines and the seem to be due to mechanical pump failing which causes engine to stop due to fuel starvation and once failed, it is not possible to restart engine.

battery – Jabiru Engines – Jabiru Forum
Jabiru engines run between 8:1 and 8.5:1 compression ratio's, this is not classed as high compression. Combustion chamber design also has a huge influence on the combustion process which will also determine what fuel is required for the engine.
