This book is dedicated to Aristid Lindenmayer on the occasion of his

60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Rethinking a key epoch in East Asian history, Hyun Ok Park formulates a new understanding of early-twentieth-century Manchuria. Most studies of the history of modern Manchuria examine the turbulent relations of the Chinese state and imperialist Japan in political, military, and economic terms. Park presents a compelling analysis of the constitutive effects of capitalist expansion on the social practices of Korean migrants in the region. Drawing on a rich archive of Korean, Japanese, and Chinese sources, Park describes how Koreans negotiated the contradictory demands of national and colonial powers. She demonstrates that the dynamics of global capitalism led the Chinese and Japanese to pursue capitalist expansion while competing for sovereignty. Decentering the nation-state as the primary analytic rubric, her emphasis on the role of global capitalism is a major innovation for understanding nationalism, colonialism, and their immanent links in social space. Through

a regional and temporal comparison of Manchuria from the late nineteenth century until 1945, Park details how national and colonial powers enacted their claims to sovereignty through the regulation of access to land, work, and loans. She shows that among Korean migrants, the complex connections among Chinese laws, Japanese colonial policies, and Korean social practices gave rise to a form of nationalism in tension with global revolution—a nationalism that laid the foundation for what came to be regarded as North Korea's isolationist politics.
