Jean Jacod, Paris Philip Protter, Ithaca January, 2004 Preface to the First Edition We present here a one semester course on Probability Theory. We also treat measure theory and Lebesgue integration, concentrating on those aspects which are especially germane to the study of Probability Theory. The book is intended to fill a current need: there ...

are disjoint and have positive probability. Hence  $F$  can have at most countable discontinuities. For an example with infinitely many jump discontinuities consider the Poisson distribution. 7.18 Let

$F$  be as given. It is clear that  $F$  is a nondecreasing function. For  $x < 0$  and  $x < 1$  right continuity of  $F$  is clear. For any  $0 < x < 1$  let  $I_n$  be ...

I had the unfortunate incident of not knowing any measure theory (analysis actually, me at the time being in my third undergraduate term) when I took a course with Jacod & Protter as the primary textbook, which needless to say, did not end well. You might find these lecture notes helpful as well. \$endgroup\$ – Alp Uzman Jan 26 '15 at 9:23
