When installing or servicing an air conditioning or refrigeration system, two of the most important tasks performed by technicians are refrigerant recovery and system evacuation. In order to perform these tasks properly, and in a safe manner,

technicians need to understand the theory behind them, having a working knowledge of the equipment and tools used, and employ accepted industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of color illustrations and includes worksheets that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual. Jaguar Xj6 Series 1 Parts Catalogue Motor Racing Publications
First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-

stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work. Jaguar Xk120, 140, 150 and Mk. 7, 8 and Workshop Manual Haynes Publishing

This glorious book tells the story of the celebrated lightweight Jaguar C-type, chassis number XKC 051, that Duncan Hamilton and Tony Rolt drove to victory in the 1953 Le Mans 24 Hours. The car went on to have a busy post-works racing career, first with Ecurie Ecosse, then with privateer drivers Bill Smith and Geoffrey Allison. Among its small number of collector custodians in later years, the names Briggs Cunningham in America and Adrian Hamilton (son of Duncan) in the UK stand out. The development of the C-type is described, focusing on the three lightweights of 1953 with thinner-gauge aluminum bodies, pioneering disc brakes, and aircraft-style fuel tanks. All this is covered in fascinating detail, supported by interviews with drivers and mechanics, a fine collection of period images and studio photographs.

Working in the Wild: Land Rover's Manual for Africa is designed to equip Land Rover users with the practical know-how it takes to make the most of the vehicle's capacity for hard work in hostile conditions. The aim of the

authors has been to produce a no-nonsense guide which can be used by virtually anyone to keep a Land Rover running to maximum efficiency and effect almost anywhere on Earth. It is based upon the in-depth operating experience of Land Rover engineers and users throughout the world over many years. The book looks at every stage of the working life of a Land Rover - the selection and purchasing of the right kind of Land Rover - how to drive it to maximum effect - how to look after it away from conventional workshops - how to avoid problems - how to overcome unavoidable difficulties - and much more. It has been welcomed by international agencies and specialists who themselves have faced the conditions and situations for which it offers advice.

Glenn's Foreign Car Repair Manual
Brooklands Book Limited

This book tells the story of how John Egan gradually overcame the odds and, piece by piece, rebuilt this great company, winning over the workforce, the overseas dealers and, most important of all, the customers. Working with Margaret Thatcher and her Government, Egan and his team of managers overcame every obstacle, every set-back, every challenge. Again and again,

it looked impossible. Yet using innovative techniques, intelligence, eloquence, openness, motor racing and much more, they saved this most charismatic company which has created some of the finest and most loved motor cars of all time. It is an amazing story that will appeal equally to car enthusiasts, those in business and readers interested in social history.
