There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford. The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry

Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book. *The Toleman Story* Veloce Publishing Ltd Saloon with 6-cyl DOHC engines & automatic transmission. British commercial manufacturers played a prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. British lorries were, therefore, considered as being the workhorses of the world, performing a wide range of duties from heavy haulage to general goods delivery. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which

was undertaken day and night, 365 days a year. The images, many contemporary colour and black and white, include some delightful publicity items in addition to covering the heritage and preservation scenes. The comprehensive text reveals much about the marques that were everyday names, along with information about Britain's road haulage and commercial vehicle industries. Malcolm Bobbitt is the author of some thirty automotive books and is a member of the Guild of Motoring Writers and the Society of Automotive Historians. This book will rekindle many memories and serve as a reminder of the important role British commercial vehicles played

Lasting six weeks, and covering 16,000 miles from London to Mexico City via some of the most varying, tortuous and difficult terrain on three continents, the 1970 World Cup Rally was a unique high-speed event, attracting many serious works teams such as Ford and British Leyland. Despite the tremendous amounts of money spent choosing and developing new cars, completing months-long route surveys, and analysing every detail of diets, oxygen

provision, and the number of crew members, out of an entry of more than 100 cars, only 23 cars made it to the finish. It was then, and remains now, the toughest rally of all time.
