contradicts many of the so-called 'facts' about the Princess and provides an affectionate, if not always uncritical, insight into this complex, troubled, but ultimately fascinating woman. Here is the authentic voice of a man who played an important role during Diana's most trying times, and in her beloved sons' formative years, and who shows himself to be an exceptionally perceptive observer of the events that unfolded around the Princess. After Inspector Wharfe resigned his position in 1993 (making headline news), Diana announced her withdrawal from public life and axed her Scotland Yard protection - a decision her former 'top cop' believes led ultimately to her death. This account presents the most intimate portrait of Diana to date, as well as a fitting tribute to one of the outstanding figures of our age.

This is the inside story of the MG Design office, from 1956 until its closure in 1980. Explaining how the various models were drawn, planned, and developed by the small team of engineers, it also shows how the input and control changed from Morris, Wolseley, Riley Group, Austin-Morris, and Austin Rover. The effects of the Triumph-Austin merger are detailed in model changes, alongside the effects of safety legislation, mainly imposed by the United States. Trying to remain as individual as possible during this period, MG developed record breakers and a unique Competition Department. Special cars were built and tested, and prototypes for the MGB replacement were drawn up – all in parallel with the development of MG production cars using engines from any part of the BMC company. The continuing support of the American market was essential and much valued, but the company's market support prioritised the TR7 – a decision that, ultimately, led to the closure of a successful, happy company.
