A Practical Approach
John Wiley & Sons
Introduction to Managerial Accounting, 4/e by Brewer/Garrison/Noreen is based on the market-leading text, *Managerial Accounting*, by Garrison, Noreen and Brewer. However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 4/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course: cost accounting/cost management. Faculty

and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.

Accounting Principles, Volume 2 ?????

This book is written for professional managers, both in public and private sectors, who have little or no background in Economics, but have to face, on a regular basis, the challenges posed by a rapidly changing macroeconomic policy environment. The book attempts to provide an

understanding of how macroeconomic policies work and, in turn, how they impact the business environment. It adopts a uniquely practical approach to explain various aspects by deliberately avoiding jargon, diagrams and equations. Instead, a story mode has been in-built for easy grasp.
