[Creative Serging Illustrated](#) Taunton Press

This book is the essential revision guide for neurology in the Membership of the Royal College of Physicians (MRCP). Neurology has been rated as the most difficult subject in MRCP examinations and there has been no concise and easy-to-use revision guide to help candidates through the exams until now. Neurology for MRCP is written by two experienced neurologists who have taught both the written (Part 1 and Part 2) and clinical (PACES) sections of the exam. This pioneering new book will also be useful for medical students sitting for their final examinations and for doctors who are preparing for the PLAB examination.

[Teach Yourself Teddy Bear Making](#) Sterling Publishing Company, Inc.

Christened “charming” and “winning” by the Washington Post and “touching” by Publishers Weekly, celebrated author Monica Holloway’s deeply moving memoir shares the unforgettable story of an extraordinary little boy and the irresistible puppy who transformed his life. The day Monica Holloway learns that her lovable, brilliant three-year-old son has autism spectrum disorder, she takes him to buy an aquarium. But what Wills really wants is a puppy, and from the moment Cowboy Carol Lawrence, an overeager and affectionate golden retriever, joins the family, Monica watches as her cautious son steps a little farther into the world. With his new “sister” Cowboy by his side, Wills finds the courage to invite kids over for playdates, conquer his debilitating fear of water, and finally sleep in his own bed with the puppy’s paws draped across his small chest. And when Cowboy turns out to need her new family as much as they need her, they discover just how much she has taught them about devotion, loyalty, and never giving up. Sometimes it’s what you don’t know to hope for that saves you. For Monica and Wills, salvation came in the form of a puppy with pale blond fur, chocolate brown eyes, a fondness for chewing the crotch out of underpants, and a limitless capacity for love.

[The Definitive Guide to Linux Network Programming](#) HarperCollins

Wouldn't it be nice to have a comfy, cozy quilt in no time at all? With these time-saving techniques, even a quilter with very limited experience can enjoy fast, gorgeous results. There's something here for all seasons and all reasons. Imagine one with yellow stars that seem to float in and out among ribbons of green and burgundy. It's made entirely with squares and half-square triangles that are easy to cut and piece, making it especially simple to create. Or, try a heavenly quilt fashioned from angel

novelty prints surrounded by coordinating fabric; it's so pretty it will enhance any room. There's more, too, including a Christmas quilt, a patriotic quilt, and a quilt for music lovers, all with easy-to-follow diagrams and instructions.

[Thanksgiving](#) National Geographic Books

From tissue-fitting pioneers Pati Palmer and Marta Alto comes a new book whose title says it all: The Palmer/Pletsch Complete Guide to Fitting: Sew Great Clothes for Every Body! Fit Any Fashion Pattern. It's been 20 years since their last book about fitting and altering sewing patterns, Fit for Real People. For Palmer and Alto, that means 20 more years of hands-on learning and experience from fitting more "real people" of all shapes and sizes from around the globe. Having long ago dispensed with tedious measuring or making a muslin to check the fit of a sewing pattern, the authors have mastered the process of tissue-fitting. This means simply "trying on" the pattern's tissue pieces to check systematically for where to alter the pattern for a custom fit. The pattern pieces themselves become the "muslin." "Systematically" means following the tissue-fitting sequence they've developed and refined. It's a no-guess order of fitting that ensures success. The book reinforces this sequence since the alteration chapters themselves are ordered in the same sequence. Readers are instructed to start with length and width, move on to the back, check the neck and shoulders, all before even considering how the pattern fits in the bust. As they work through the pattern, sewers will alter the tissue and try on again until the tissue fits well. The book then instructs how to pin-fit the fabric for a final tweaking before sewing. The book explains all facets of pattern fitting and alteration to give readers the background and guidance they need to achieve a custom fit on any pattern from any company. Instructions include: * Take just one measurement to determine the right pattern size to buy. Find out what to do if you are between sizes or a different size top and bottom. * Make a "body map" with a close-fitting dress pattern to see how you differ from the "standard" on which sewing patterns are based. * Learn from "real people" examples of a variety of bodies and their individual alterations. * Use the book's new "wrinkle dictionary" to identify a needed pattern alteration. "Wrinkles point to the problem," say the authors, and now you can look up the page reference for a solution. * See how age can affect body shape, from preteen to octogenarian. * Take note of the latest sewing techniques for garment details that affect fit, such as darts, zippers and sleeves, for enhancing the look of a well-fitted garment. * Learn basic skills for designing or redesigning for myriad variations using the same pattern. Throughout the book, step-by-step instructions are accompanied by full-color photography and a new style of technical art that is extremely clear. Short captions explain each illustration. As a bonus, the authors detail the evolution of ready-to-wear and pattern sizing over the past century, along with their own history in pioneering the art and practice of tissue-fitting.

Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII. AUDIENCE: Appropriate for anyone interested in learning programming with Visual Basic 2008.

Take the Mystery Out of Your Serger Explore the creative options with Georgie Melot's tried-and-true methods. Learn the ins, outs, overs and unders of your serger! Ready, Set, Serge is a fun, informative book that rewards you with success every time. Georgie's encouraging, learn-by-doing approach guides you through the basics so you'll be creating simple but attractive projects in no time. Gift bags, book covers, pot holders, bath mitts and other attractive pieces can be made from fabric scraps and fat quarters, or from ready-made items such as bath towels. In Ready, Set, Serge you'll find: • A thorough tour of the serger, from how to thread the needles and loopers to identifying specialty feet • A guide to serger stitches and what each is used for • 16 projects in both "basic" and "stepped-up" versions so you can learn general skills, then add more advanced techniques • Clear steps accompanied by photos, project templates and diagrams • Friendly expert advice from a professional serger and instructor Once you see how easy it is, you may find it hard to stop. Are you ready? If so, then get set to serge!

[Creative Sewing Techniques by Machine](#) World Scientific

Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women's military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women's military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.
