After an immense process of careful restoration and conservation, the outstanding artistry of the Great East Window is revealed afresh through state-of-the art photography that captures the complete sequence of major panels, in corrected placements, for the very first time. At the size of a tennis court, it is the largest single expanse of medieval stained glass in Britain and one of the largest medieval windows ever made. This visual feast is brought to life by expert author Sarah Brown, who explores the history, artistry, meaning and restoration of the window, revealing new insights on a fragile masterpiece that has been described as England's Sistine Chapel. Ground breaking new research has shed exciting new light on the window's complex narratives, relating its story to the Minster's history and

liturgy. The Great East Window of York Minster explores the window's biblical presentation of the beginning and end of time, the window's relationships with other media and the technical processes behind its creation. This stunning, illustrated hardback presents an engaging contextual analysis of the window's unequivocal position as an English masterpiece.

Instruction Manual for Sewing Machine Packt Publishing Ltd

In this myth-shattering study Isaiah Friedman provides a new perspective on events in the Middle East during World War I and its aftermath. He shows that British officials in Cairo mistakenly assumed that the Arabs would rebel against Turkey and welcome the British as deliverers. Sharif (later king) Hussein did rebel, but not for nationalistic motives as is generally presented in historiography. Early in the war he simultaneously negotiated with the British and the Turks but, after discovering that the Turks

intended to assassinate him, finally sided with the British. There was no Arab Revolt in the Fertile Crescent. It was mainly the soldiers of Britain, the Commonwealth, and India that overthrew the Ottoman rule, not the Arabs. Both T.E. Lawrence ("Lawrence of Arabia") and Sir Mark Sykes hoped to revive the Arab nation and build a new Middle East. They courted disappointment: the Arabs resented the encroachment of European Powers and longed for the return of the Turks. Emir Feisal too became an exponent of Pan-Arabism and a proponent of the "United Syria" scheme. It was supported by the British Military Administration who wished thereby to eliminate the French from Syria. British officers were antagonistic to Zionism as well and were responsible for the anti-Jewish riots in Jerusalem in April 1920. During the twenties, unlike the Hussein family and their allies, the peasants (fellaheen), who constituted the majority of the Arab population in Palestine, were not inimical towards the Zionists. They maintained that "progress and prosperity lie in the path of brotherhood" between Arabs and Jews and regarded Jewish immigration and settlement to be beneficial to the country. Friedman argues that, if

properly handled, the Arab-Zionist conflict was not inevitable. The responsibility lay in the hands of the British administration of Palestine.

D_TEX presents itself as a starting point at a crossroads of ideas and debates around the complex universe of Textile Design in all its forms, manifestations and dimensions. The textile universe, allied to mankind since its beginnings, is increasingly far from being an area of exhausted possibilities, each moment proposing important innovations that need a presentation, discussion and maturation space that is comprehensive and above all inter- and transdisciplinary. Presently, the disciplinary areas where the textile area is present are increasing and important, such as fashion, home textiles, technical clothing and accessories, but also construction and health, among others, and can provide new possibilities and different disciplinary areas

and allowing the production of new knowledge. D_TEX proposes to join the thinking of design, with technologies, tradition, techniques, and related areas, in a single space where ideas are combined with the technique and with the projectual and research capacity, thus providing for the creation of concepts, opinions, associations of ideas, links and connections that allow the conception of ideas, products and services. The interdisciplinary nature of design is a reality that fully reaches the textile material in its essence and its practical application, through the synergy and contamination by the different interventions that make up the multidisciplinary teams of research. The generic theme of D_TEX Textile Design Conference 2017, held at Lisbon School of Architecture of the University of Lisbon, Portugal on November 2-4, 2017, is Design the Future, starting from the crossroads of ideas and debates, a new starting point for the exploration of textile materials, their identities and innovations in all their dimensions.
