From a leading scholar of the Middle East and North Africa comes a new way of thinking about the Arab Spring and the meaning of revolution. From the standpoint of revolutionary politics, the Arab Spring can seem like a wasted effort. In Tunisia, where the wave of protest began, as well as in Egypt and the Gulf, regime change never fully took hold. Yet if the Arab Spring failed to disrupt the structures of governments, the movement was transformative in farms, families, and factories, souks and schools. Seamlessly blending field research, on-the-ground interviews, and social theory, Asef Bayat shows how the practice of everyday life in Egypt and Tunisia was fundamentally altered by revolutionary activity. Women, young adults, the very poor, and members of the underground queer community can credit the Arab Spring with steps toward equality and freedom. There is also potential for further progress, as women’s rights in particular now occupy a firm place in public discourse, preventing retrenchment and ensuring that marginalized voices remain louder than in prerevolutionary days. In addition, the Arab Spring empowered workers: in Egypt alone, more than 700,000 farmers unionized during the years of protest. Labor activism brought about material improvements for a wide range of ordinary people and fostered new cultural and political norms that the forces of reaction cannot simply wish away. In Bayat’s telling, the Arab Spring emerges as a paradigmatic case of òrevolutionÓñrevolution that engenders reform rather than radical change. Both a detailed study and a moving appeal, Revolutionary Life identifies the social gains that were won through resistance.

In the twenty-first century, the Indo-Pacific has emerged as a crucial geostrategic region for trade, investment, energy supplies, cooperation, and competition. It presents complex maritime security challenges and interlocking economic interests that require the development of an overarching multilateral security framework. This volume develops common approaches by focusing on geopolitical challenges, transnational security concerns, and multilateral institution-building and cooperation. The chapters, written by practitioners, diplomats, policymakers, and scholars from the three major powers discussed (United States, China, India) explain the opportunities and risks in the Indo-Pacific region and identify specific naval measures needed to enhance maritime security in the region.

Now in its second edition, How to Read Texts introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, How to Read Texts is an indispensable guide for students making the transition to university study.

This paper provides deeper insights on a few themes with regard to the experience with macroeconomic management in resource-rich developing countries (RRDCs). First, some stylized facts on the performance of these economies relative to their non-resource peers are provided. Second, the experience of Fund engagement in these economies with respect to surveillance, programs, and technical assistance is assessed. Third, the experience of selected countries with good practices in the management of the natural resource wealth is presented. Fourth, the experience of IMF advice in helping RRDCs set up resource funds is discussed. Finally, the main themes and messages from the IMF staff consultation with external stakeholders (CSOs, policy makers, academics) are presented.

 Professor Chen Ning Yang, an eminent contemporary physicist, was Professor at the Institute for Advanced Study, Princeton, New Jersey, from 1955 to 1966, and Albert Einstein Professor of Physics at the State University of New York at Stony Brook until his retirement in 1999. He has been Distinguished Professor-at-Large at the Chinese University of Hong Kong since 1986 and Professor at Tsinghua University, Beijing, since 1998. Since receiving his PhD from the University of Chicago in 1948, Prof Yang has made great impacts in both abstract theory and phenomenological analysis in modern physics. In 1983, he published “ Selected Papers (1945–1980), With Commentary ” . It has been considered by Freeman Dyson as one of his favorite books. The present book is a sequel to that earlier volume. It is a collection of his personally selected papers (1971–2012) supplemented by his insightful commentaries. Its contents reflect Professor Yang's changing interests after he reached age sixty. It also includes commentaries written by him in 2011 when he is 89 years old. The papers and commentaries in this unique collection comprise a remarkable personal and professional chronicle, shedding light on both the intellectual development of a great physicist and on the nature of scientific inquiry.  “ We ' re becoming like Europe. ” This expression captures many Americans ' sense that something has changed in American economic life since the Great Recession ' s onset in 2008: that an economy once characterized by commitments to economic liberty, rule of law, limited government, and personal responsibility has drifted in a distinctly “ European ” direction. Americans see, across the Atlantic, European economies faltering under enormous debt; overburdened welfare states; governments controlling close to fifty percent of the economy; high taxation; heavily regulated labor markets; aging populations; and large numbers of public-sector workers. They also see a European political class seemingly unable—and, in some cases, unwilling—to implement economic reform, and seemingly more concerned with preserving its own privileges. Looking at their own society, Americans are increasingly asking themselves: “ Is this our future? ” In Becoming Europe, Samuel Gregg examines economic culture—the values and institutions that inform our economic priorities—to explain how European economic life has drifted in the direction of what Alexis de Tocqueville called “ soft despotism, ” and the ways in which similar trends are manifesting themselves in the United States. America, Gregg argues, is not yet Europe; the good news is that economic decline need not be its future. The path to recovery lies in the distinctiveness of American economic culture. Yet there are ominous signs that some of the cultural foundations of America ' s historically unparalleled economic success are being corroded in ways that are not easily reversible—and the European experience should serve as the proverbial canary in the coal mine.

 This title includes a number of Open Access chapters. Food insecurity and disease are inextricably linked. The chapters in this valuable articles compendium reinforce that message by specifically linking food insecurity to various forms of chronic disease, including HIV/AIDS and obesity, as well as mental health issues. Providing a nuanced look at food insecurity and its connection to disease, the quality of the research gathered here advances our understanding of this issue; the chapter authors have provided us with a solid foundation on which to build well-informed clinical practice, further research, and effective future policy. The chapters included are broadly broken into five sections: defining food security and insecurity food insecurity and mental health food insecurity and HIV food security and obesity and diabetes policy, power, and politics With a roster of expert contributors from around the world, the book examines a variety of issues, including the significant association between food insecurity and mania symptoms the relationship between food insecurity and HIV risk how food insecurity affects individuals ' ability to manage their diabetes the link between obesity and food insecurity how food insecurity affects women and girls, who are disproportionately disempowered through current processes and politics of food ' s production, consumption, and distribution the power of large food corporations over the global food system the paradox of the food insecurity and obesity (since 1995 an additional 65 million people are malnourished, and one in five adults is now overweight) The research in the final section of the book addresses the "what next?" question; other words, how can we shape politics and policy to address this urgent international crisis? This informative compendium will provide insight on these important issues for for students and scholars in security studies, international politics, and environmental studies.
