An exploration of how technology and best intentions collide in the heat of war A New York Times Book Review Editors’ Choice In The Bomber Mafia, Malcolm Gladwell weaves together the stories of a Dutch genius and his homemade computer, a band of brothers in central Alabama, a British psychopath, and pyromaniacal chemists at Harvard to examine one of the greatest moral challenges in modern American history. Most military thinkers in the years leading up to World War II saw the airplane as an afterthought. But a small band of idealistic strategists, the “Bomber Mafia,” asked: What if precision bombing could cripple the enemy and make war far less lethal? In contrast, the bombing of Tokyo on the deadliest night of the war was the brainchild of General Curtis LeMay, whose brutal pragmatism and scorched-earth tactics in Japan cost thousands of civilian lives, but may have spared even more by averting a planned US invasion. In The Bomber Mafia, Gladwell asks, “Was it worth it?” Things might have gone differently had LeMay’s predecessor, General Haywood Hansell, remained in charge. Hansell believed in precision bombing, but when he and Curtis LeMay squared off for a leadership handover in the jungles of Guam, LeMay emerged victorious, leading to the darkest night of World War II. The Bomber Mafia is a riveting tale of persistence, innovation, and the incalculable wages of war. Turner Classic Movies Presents Leonard Maltin's Classic Movie Guide Routledge

"If you're as interested in Japan as I am, I think you'll find that The Power to Compete is a smart and thought-provoking look at the future of a fascinating country." - Bill Gates, "5 Books to Read This Summer" Father and son — entrepreneur and economist — search for Japan's economic cure The Power to Compete tackles the issues central to the prosperity of Japan — and the world — in search of a cure for the "Japan Disease." As founder and CEO of Rakuten, one of the world's largest Internet companies, author Hiroshi Mikitani brings an entrepreneur's perspective to bear on the country's economic stagnation. Through a freewheeling and candid conversation with his economist father, Ryoichi Mikitani, the two examine the issues facing Japan, and explore possible roadmaps to revitalization. How can Japan overhaul its economy, education system, immigration, public infrastructure, and hold its own with China? Their ideas include applying business techniques like Key Performance Indicators to fix the economy, using information technology to cut government bureaucracy, and increasing the number of foreign firms with a head office in Japan. Readers gain rare insight into Japan's future, from both academic and practical perspectives on the inside. Mikitani argues that Japan's tendency to shun international frameworks and hide from global realities is the root of the problem, while Mikitani Sr.'s background as an international economist puts the issue in perspective for a well-rounded look at today's Japan. Examine the causes of Japan's endless economic stagnation Discover the current efforts underway to enhance Japan's competitiveness Learn how free market "Abenomics" affected Japan's economy long-term See Japan's issues from the perspective of an entrepreneur and an economist Japan's malaise is seated in a number of economic, business, political, and cultural issues, and this book doesn't shy away from hot topics. More than a discussion of economics, this book is a conversation between father and son as they work through opposing perspectives to help their country find The Power to Compete.

The Foreign Relations of the United States series presents the official documentary historical record of major foreign policy decisions and significant diplomatic activity of the United States Government. This volume is part of a subseries of the Foreign Relations of the United States that documents the most issues in the foreign policy of Presidents Richard M. Nixon and Gerald R. Ford. The subseries presents in multiple volumes a comprehensive documentary record of major foreign policy decisions and actions of the administrations of Presidents Nixon and Ford. This specific volume documents U.S. policy towards three important countries in Southeast Asia: Thailand, the Philippines, and Indonesia, 1969-1972, a period when the future of Southeast Asia was a major concern of American foreign policy makers. This is the last print volume to document U.S. policy towards Southeast Asia, other han those print volumes that document the Vietnam War during the Nixon-Ford administrations. For the January 1973 to January 1977 period, U.S. policy towards Southeast Asia (nations other than Vietnam, Laos, and Cambodia is covered in an electronic-only volume. The decision to cover Thailand, the Philippines, and Indonesia for 1969-1975 in detail in this print volume was based on the fact that each country was a key ally - either formally or de facto - of the United States during the Vietnam war, and each played a specific role during the conflict. Thailand sent troops to fight in Vietnam, provided bases for U.S. airpower in Southeast Asia, and secretly provided training, troops, and arms to support U.S.-backed guerilla forces in Laos. The Philippines sent a 2,000-man civic action group to South Vietnam, and Filipinos made up many of the administrative contractors in South Vietnam. Indonesia provided key arms support to the Lon Nol government at a crucial time. In addition, Thailand, Philippines, and Indonesia were important countries in their own right, with key U.S. military and economic assistance programs, large embassies, and close relations with the United States. In each country, the United States had a considerable interest in their government's success. The chapter on Thailand, the largest in the volume, has the most obvious and closest associations with the Vietnam War. A principal theme of this chapter is U.S. efforts to assure the Thais that unilateral withdrawal of U.S. troops in South Vietnam and a projected settlement of the war did not mean a lesser U.S. commitment to Thailand. A second key theme of the volume is the covert military role that Thailand's military forces played in supporting the anti-communist forces in Laos and the potential role they could play in supporting the Lon Nol government in Cambodia. The second largest chapter in this volume documents U.S. policy towards the Philippines. The relationship between President Ferdinand Marcos and the Nixon administration is the dominant theme of this chapter. U.S. officials had to assure Marcos that they were neutral in the 1969 Philippines presidential elections and discourage his desire for a special channel to Washington. Corruption in the Marcos government, Marcos's's desire to revise the constitution to his benefit, and his eventual declaration of martial law in September 1972 in the face of student riots caused U.S. officials in Manila and Washington to assess whether he was the best man to lead the Philippines from the U.S. point of

view. Other themes that are documented in the chapter are the ones that predate the Vietnam War, such as preference for Philippines exports to the United States, U.S. benefits for Filipino veterans who served in the Second World War, and U.S. bases in the Philippines. The final chapter in the volume deals with Indonesia, officially a non-aligned nation, but under strongman General Suharto, a de factor ally of the United States. The principal themes of this chapter are the question of Indonesia''s international debt left over from the Sukarno years and U.S. support for multilateral Indonesian debt relief among international lending organizations. A related theme is the amount of U.S. bilateral aid provided to Indonesia.

Information modelling and knowledge bases have become ever more essential in recent years because of the need to handle and process the vast amounts of data which now form part of everyday life. The machine to machine communication of the Internet of Things (IoT), in particular, can generate unexpectedly large amounts of raw data. This book presents the proceedings of the 27th International Conference on Information Modelling and Knowledge Bases (EJC2017), held in Krabi, Thailand, in June 2017. The EJC conferences originally began in 1982 as a co-operative initiative between Japan and Finland, but have since become a world-wide research forum bringing together researchers and practitioners in information modelling and knowledge bases for the exchange of scientific results and achievements. Of the 42 papers submitted, 29 were selected for publication here, and these cover a wide range of information-modelling topics, including the theory of concepts, semantic computing, data mining, context-based information retrieval, ontological technology, image databases, temporal and spatial databases, document data management, software engineering, cross-cultural computing, environmental analysis, social networks, and WWW information. The book will be of interest to all those whose work involves dealing with large amounts of data.

This collection of narratives from autistic adults is structured around their decades of experience of life, covering 20s, 30s, 40s, 50s, 60 and 70s+. These are varied and diverse, spanning different continents, genders, sexualities and ethnicities, yet the author highlights the common themes that unite them and skilfully draws out these threads. Each chapter is based on accounts from one age group and includes accounts from people of that age, giving an insight into the history of autism and signifying how gaining a diagnosis (or not) has changed people's lives over time. The book is about ageing with an autistic mind, and helping the reader find connections between neurotypical and neurodiverse people by acknowledging the challenges we all face in our past, present and

futures.
