After a bout with cancer Brent Lea was forced to reassess his priorities in life. One of his long-held visions was to spend an extended period of time in the Canadian Rockies, backpacking up valleys and over passes. To this end he took a three month leave of absence from his job, and accompanied by the ghost of Bill Peyto, lived out his dream. The ultimate in wilderness travel in western Canada. He immersed himself in the mountains, covering over 450 km in four national and two provincial parks, crossing 17 alpine passes and hiking past more than 65 backcountry lakes. Brent Lea's beautifully written account will appeal to anyone who has hiked in the mountains. Read about the time when Off to the right, in some willow shintangle, a bear stood watching us, unprovoked but getting more curious by the second. With the adrenaline coursing through my body, I couldn't decide whether I should grab the camera or grab the bear spray, so I did neither; I just let my senses take in the event. He observes that, Wandering around in the warm tangerine glow of the setting sun remains one of the most poignant memories of that summer. We felt so removed from the trappings of civilization; we were alone, there were no other hikers in this valley. The ancient fire-killed trees stood as silent sentinels against a darkening sky that was busy ushering in the first stars. He also relates the less appealing experiences of the backcountry when Satan's minions hovered above the camp, darkening the sky, or so it seemed, crawling over our packs and flying at our faces with voracious intensity.

Considered by many to be a founder of Afrofuturism, Sun Ra—aka Herman Blount—was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which, dressed in Egypto-space costumes, played everything from boogie-woogie and swing to fusion and free jazz. John Szwed's *Space is the Place* is the definitive biography of this musical polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was mercurial and confounding. Szwed's readers—whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather—will find that, indeed, space is the place.

Industrial Development and Manufacturers' Record John Wiley & Sons

"But the point of Burke's work, and the significance of his achievement, is not that he points out that religion and language affect each other, for this has been said

before, but that he proceeds to demonstrate how this is so by reference to a specific symbolic context. After a discussion 'On Words and The Word,' he analyses verbal action in St. Augustine's *Confessions*. He then discusses the first three chapters of *Genesis*, and ends with a brilliant and profound 'Prologue in Heaven,' an imaginary dialogue between the Lord and Satan in which he proposes that we begin our study of human motives with complex theories of transcendence,' rather than with terminologies developed in the use of simplified laboratory equipment. . . . Burke now feels, after some forty years of search, that he has created a model of the symbolic act which breaks through the rigidities of the 'sacred-secular' dichotomy, and at the same time shows us how we get from secular and sacred realms of action over the bridge of language. . . . Religious systems are systems of action based on communication in society. They are great social dramas which are played out on earth before an ultimate audience, God. But where theology confronts the developed cosmological drama in the 'grand style,' that is, as a fully developed cosmological drama for its religious content, the 'logologer' can be further studied not directly as knowledge but as anecdotes that help reveal for us the quandaries of human governance." --Hugh Dalziel Duncan from *Critical Responses to Kenneth Burke, 1924 - 1966*, edited by William H. Rueckert (Minneapolis: University of Minnesota Press, 1969).

First published in 1997, the *Compendium* is an important reference tool for everyone who works in or visits the Antarctic Peninsula - setting forth updated site-descriptive information, census data, species presence/absence data, and regional maps compiled by the Antarctic Site Inventory project since 1994. The Inventory is operated by the US non-profit science and educational organization Oceanites, Inc., the only non-profit, publicly supported, science project working in Antarctica, and the only project monitoring and analysing environmental changes throughout the vastly warming Antarctic Peninsula ecosystem, where it's warming faster - or as fast - as any other location on Earth. The new, 3rd edition covers the 142 sites visited and censused by Antarctic Site Inventory researchers in 17 field seasons through February 2011.

Dennis Moore, details the differences between automotive and marine performance components and design. Topics covered include: -- The differences between auto and marine engines -- Starters, flywheels, ignition systems, exhaust and cooling -- Parts combinations and recommendations for performance applicationsAlso included are photo/how-to sequences and instructions on build-up and installation as well as tuning and repair.

The Fifth Wheel

In this memoir, Michael Clements recounts growing up in the early days of stock car racing. From 1957 through 1965, his father, Louie, travelled the NASCAR circuit, bringing his wife and five children along to every race. Owner and crew chief for champion driver Rex White, Louie introduced many mechanical innovations still used in NASCAR today, and his children grew up on the road between races, befriending many racing legends along the way. Clements' memoir is full of stories about NASCAR's early era and the men and women who built the sport. It includes a wealth of never-before-seen photographs from his personal collection.
