When you're learning Java, you need access
to the documentation. You need to learn the
core of the language, its basic syntax, but a lot

of working with Java is about working with the
runtime library—the set of packages and
classes that are provided with the JRE and the
JDK. You can get to a certain amount of
documentation from within IntelliJ IDEA very
simply.

[API reference](#) | [Android Developers](#)

The JavaMail API also supports several System
properties; see the `javax.mail.internet` package
documentation for details. The JavaMail
reference implementation includes protocol
providers in subpackages of `com.sun.mail`. Note
that the APIs to these protocol providers are not
part of the standard JavaMail API. Portable
programs will not use these APIs.
