Volume 2 for Class -XII Goyal Brothers Prakashan

- Strictly as per the Full syllabus for Board 2022-23 Exams
- Includes Questions of the both - Objective & Subjective Types Questions
- Chapterwise and Topicwise Revision Notes for in-depth study
- Modified &

Empowered Mind Maps & Mnemonics for quick learning • Concept videos for blended learning • Previous Years ' Board Examination Questions and Marking scheme Answers with detailed explanation to facilitate exam-oriented preparation. • Examiners comments & Answering Tips to aid in exam preparation. • Includes Topics found Difficult & Suggestions for students. • Includes Academically important

Questions (AI)

- Dynamic QR code to keep the students updated for 2023 Exam paper or any further ISC notifications/circulars
- Oswaal ICSE Question Bank Class 10 Computer Applications Book (For 2023 Exam)
Oswaal Books and Learning Private Limited
- These two volumes constitute the Proceedings of the 7th International Workshop on Soft Computing Applications (SOFA 2016), held on 24 – 26 August 2016 in Arad, Romania. This edition was organized by Aurel Vlaicu University of Arad, Romania, University of Belgrade, Serbia, in

conjunction with the Institute of Computer Science, Iasi Branch of the Romanian Academy, IEEE Romanian Section, Romanian Society of Control Engineering and Technical Informatics (SRAIT) - Arad Section, General Association of Engineers in Romania - Arad Section, and BTM Resources Arad. The soft computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness and lower costs. Soft computing facilitates the combined use of fuzzy logic,

neurocomputing, evolutionary computing and probabilistic computing, leading to the concept of hybrid intelligent systems. The rapid emergence of new tools and applications calls for a synergy of scientific and technological disciplines in order to reveal the great potential of soft computing in all domains. The conference papers included in these proceedings, published post-conference, were grouped into the following areas of research:

- Methods and Applications in Electrical Engineering
- Knowledge-Based Technologies for Web Applications, Cloud Computing, Security Algorithms and Computer Networks

- Biomedical Applications
- Image, Text and Signal Processing
- Machine Learning and Applications
- Business Process Management
- Fuzzy Applications, Theory and Fuzzy Control
- Computational Intelligence in Education
- Soft Computing & Fuzzy Logic in Biometrics (SCFLB)
- Soft Computing Algorithms Applied in Economy, Industry and Communication Technology
- Modelling and Applications in Textiles

The book helps to disseminate advances in selected active research directions in the field of soft computing, along with current issues and applications of related topics. As

such, it provides valuable information for professors, researchers and graduate students in the area of soft computing techniques and applications.

Goyal Brothers Prakashan ISC Computer Science for Class 12 S. Chand Publishing This book constitutes the refereed proceedings of the 11th Asian Symposium on Programming Languages and Systems, APLAS 2013, held in Melbourne, Australia, in December 2013. The 20 regular papers presented together with the abstracts of 3 invited talks were carefully reviewed and selected from 57 submissions. The papers cover a variety of

foundational and practical issues in programming languages and systems.

Soft Computing Applications John Wiley & Sons

The field of SMART technologies is an interdependent discipline. It involves the latest burning issues ranging from machine learning, cloud computing, optimisations, modelling techniques, Internet of Things, data analytics, and Smart Grids among others, that are all new fields. It is an applied and multi-disciplinary subject with a focus on Specific, Measurable, Achievable, Realistic & Timely system operations combined with Machine

intelligence & Real-Time computing. It is not possible for any one person to comprehensively cover all aspects relevant to SMART Computing in a limited-extent work. Therefore, these conference proceedings address various issues through the deliberations by distinguished Professors and researchers. The SMARTCOM 2020 proceedings contain tracks dedicated to different areas of smart technologies such as Smart System and Future Internet, Machine Intelligence and Data Science, Real-Time and VLSI Systems, Communication and Automation Systems. The proceedings can be used as an advanced reference

for research and for courses in smart technologies taught at graduate level.
