### DevDocs API Documentation

For best performance, attach delegated events at a document location as close as possible to the target elements. Avoid excessive use of `document` or `document.body` for delegated events on large documents. jQuery can process simple selectors of the form `tag#id.class` very quickly when they are used to filter delegated events.

### JavaScript | MDN

JavaScript documentation in WordPress takes the

---

form of either formatted blocks of documentation or inline comments. The following is a list of what should be documented in WordPress JavaScript files: Functions and class methods
