It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men

he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

On the eve of the five hundredth anniversary of the discovery of the Americas, it bears remembering that in 1492, as Columbus was making his historic voyage, Europe was flourishing, at the very height of the Renaissance that transformed a continent. In art, politics, commerce, and society, the medieval world had given way to the modern era. But what was Europe really like then? What did London, Paris, Rome, and the other great centers of culture actually look like, and what was it like to travel from one to the other when the horse and the sailing ship were the most expeditious means available? How long would a typical journey take? Where would one stay and what could one eat along the way? And whom might one expect to meet? Both kings and pilgrims, to be sure. In Travel Guide to Europe 1492, the noted Italian historian Lorenzo Camusso offers modern-day readers and would-be adventurers ten itineraries for trips commonly taken in both the near and far reaches of fifteenth-century Europe. Whether Camusso's wayfarer is an ambitious young banker on the road From Florence to Bruges; the great painter Albrecht Durer on his way from Nuremberg to Venice, a shipbuilder whose highly prized craft takes him from Seville to Antwerp via Barcelona, Beaune, and Paris; or a lonely pilgrim wandering from Vezelay to far-off Santiago de Compostela, he offers a vivid account of what such a journey would be like--the sights, sounds, perils, and pleasures--and in so doing he renders the very fabric of day-to-day life during this momentous year in Europe's history.

Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women ' s military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women ' s military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.
