Fundamentals of Chemical Engineering Thermodynamics is the clearest and most well-organized introduction to thermodynamics theory and calculations for all chemical engineering undergraduates. This brand-new text makes thermodynamics far easier to teach and learn. Drawing on his award-winning courses at Penn State, Dr. Themis Matsoukas organizes the text for more effective learning, focuses on why as well as how, offers imagery that helps students conceptualize the equations, and illuminates thermodynamics with relevant examples from within and beyond the chemical engineering discipline. Matsoukas presents solved problems in every chapter, ranging from basic calculations to realistic safety and environmental applications.

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, *Extreme Economies* turns the logic of

modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

In a globalizing and expanding world, the need for research centered on analysis, representation, and management of landscape components has become critical. By providing development strategies that promote resilient relations, this book promotes more sustainable and cultural approaches for territorial construction. *The Handbook of Research on Methods and Tools for Assessing Cultural Landscape Adaptation* provides emerging research on the cultural relationships between a community and the ecological system in which they live. This book highlights important topics such as adaptive strategies, ecosystem services, and operative methods that explore the expanding aspects of territorial transformation in response to human activities. This publication is an important resource for academicians, graduate students, engineers, and researchers seeking a comprehensive collection of research focused on the social and ecological components in territory development.

When a remote valley deep in East Africa is discovered, a handsome tribe, descended from the Queen of Sheba, is found living there. The Sultan of Zanzibar is keen to establish his presence. Tippu Tip, the Sultan's Machiavellian minister, orders a heavily armed expedition, led by the unwilling Captain Khalil, to seize the valley as a stepping-stone towards the sultan's ambition of ruling the whole of Africa. *The Cruel Trade* tells the

story of a fascinating and brave expedition as it crosses the untamed savannah. A tale of betrayal and fear, but also courage and great love, this dramatic story gives an illuminating insight into a turning point in the long and bloody history of East African slavery.

#### Shaq Talks Back Newnes

THE following translation was undertaken from a desire to lay before the English-speaking people the full treasury of epical beauty, folklore, and mythology comprised in The Kalevala (the Land of Heroes, the national epic of the Finns.) The Kalevala describes Finnish nature very minutely and very beautifully. Grimm says that no poem is to be compared with it in this respect. A deeper and more esoteric meaning of the Kalevala, however, points to a contest between Light and Darkness. The numerous myths of the poem are likewise full of significance and beauty, and the Kalevala should be read between the lines, in order that the full meaning of this great epic may be comprehended. The whole poem is replete with the most fascinating folk-lore about the mysteries of nature, the origin of things, the enigmas of human tears, and, true to the character of a national epic, it represents not only the poetry, but the entire wisdom and accumulated experience of a nation. One of the most notable characteristics of

the Finnish mythology is the interdependence among the gods. The Finnish deities, like the ancient gods of Italy and Greece, are generally represented in pairs. They have their individual abodes and are surrounded by their respective families. The Sun and the Moon each have a consort, and sons and daughters. Only two sons of Paeivae appear in The Kalevala, one comes to aid of Wainamoinen in his efforts to destroy the mystic Fire-fish, by throwing from the heavens to the girdle of the hero, a "magic knife, silver-edged, and golden-handled;" the other son, Panu, the Fire-child, brings back to Kalevala the fire that had been stolen by Louhi, the wicked hostess of Pohyola. 10% of the net profit from the sale of this book will be donated to charities.

The Character Coach's Playbook is not just a book, it is a tool! With millions of athletes playing today, it is time to coach the coaches about coaching. Very few (Little League through high school) coaches have any training in the arena of character development. Every great coach from Lombardi to Bowden and Osborne to Wooden understood the importance of personal character. Steve and Huey have produced a practical guide to assist and train coaches in this most important endeavor. The playbook sets out weekly characteristics to explain and emphasize throughout their practices so that they develop the inner being, as well as the outer being. This book is meant to be a constant reminder that most athletes will not play beyond Little League. Instead of focusing all coaching efforts on the short-lived life of playing, learn to coach for a quality of life. Every coach has a unique opportunity to influence their players. Remember coach "they will always remember coach."
