The Trispark Java Dicom Toolkit
User Guide

JDT relies here on the fact that Java Strings are Unicode and every used DICOM character set can be properly represented as a java String object. JDT will use the character sets specified in the SpecificCharacterSet tag when

converting data element values into Java Strings.

I am going to need to do some development with Eclipse JDT while on holiday. I will be off-line for the most of the time and therefore I will not be able to access the [Eclipse JDT API documentation] (edit : link is now dead) on the Web. I can't find a link to download the documentation in ZIP or PDF or, best of all, CHM format.
