[SOLVED: 2007 jeep electronic throttle control light - Fixya](#)

The Electronic Throttle Control system is the inner workers of the engine that signals the throttle when the pedal is pushed. The Electronic Throttle Control system within most vehicles is constructed with three important parts: the accelerator pedal, the throttle valve, and a control module or PCM. There is no direct cable that connects the pedal to the throttle of your vehicle. So often times this technology is called Drive by the Wire.

[Jeep Cars Electronics Engine Control](#)

One of the most recent tasks (in the last decade or so, anyway) delegated to the engine computer came about only as automotive companies switched from mechanical throttle control to electronic throttle control. Previously, when your

---

foot made contact with the gas pedal, it was connected to a cable that went directly to the engine so the engine could decide how much fuel to inject, based on whether you caressed the pedal, mashed it to the floor, or most likely, somewhere in between.

#### Jeep Cars Electronics Engine Control Systems

Electronic throttle control can't start jeep Electronic throttle control (ETC) is an automobile technology which severs the mechanical link between the accelerator pedal and the throttle. A Throttle Position Sensor (TPS) is used to control traction control, fuel injections, etc.

Renix - Wikipedia

Renix (Renix Electronique) was a joint venture by Renault and Bendix that designed and manufactured automobile electronic ignitions, fuel injection systems, electronic automatic transmission controls, and various engine sensors. Major applications included various Renault and Volvo vehicles. The

name became synonymous in the U.S. with the computer and fuel injection system used on the AMC/Jeep ...
