Remove battery and drain cooling system. Remove air cleaner and engine compartment light from hood. Scribe hinge location and remove hood. Disconnect and plug front fuel line at pump and fuel return line at frame.

Engine Removal. Step 1: The first step before pulling the engine is to have a plan. Take a few minutes and look carefully at what you think might need to be out of the way before the engine can be pulled out of the frame. Don't forget your physical space either (height of your work space or room in front of the Jeep to move the engine hoist).
