If engine, transmission, transfer case, axle, steering, electrical or metal restoration seem difficult or beyond your skills, here is the fix!

Moses Ludel, Jeep vehicle expert, automotive instructor and author of the "Jeep Owner's Bible, demystifies the most complex service procedures. Talking with hundreds of enthusiasts at his Camp Jeep workshops, Moses discovered that hobbyists and

---

professional Jeep vehicle mechanics alike want heavily illustrated, step-by-step 'how-to' manuals. For the Jeep vehicle owner who finds the typical workshop manual impossible to decipher, Moses Ludel breaks ground with this book. No longer will you struggle with pages of text and an occasional photograph. The author and photographer/illustrator of more than 2,500 magazine tech articles and five popular "Owner's Bible books, Moses undertook the "Jeep CJ Rebuilder's Manual to meet the needs of Jeep vehicle owners and restorers. With this ambitious effort, Moses launches a series of 'how-to' rebuild manuals with a photograph marking each technical step. For an authentic restoration to original equipment standards or sensible upgrades that will enhance the performance of your vintage Jeep CJ, this is the book. Moses Ludel brings his mastery of Jeep technology into your shop!

To answer these questions, Mathijs Pelkmans critically examines the trajectories of a range of ideologies as they move into the post-Soviet frontier in Central Asia. Ethnographically rooted in the everyday life of a former mining town in southern Kyrgyzstan, Fragile

Conviction shows how residents have dealt with the existential and epistemic crises that arose after the collapse of the Soviet Empire. Residents became enchanted by the truths of Muslim and Christian missionaries, embraced the teachings of neoliberal and nationalist ideologues, and were riveted by the visions of shamanic healers. But no matter how much enthusiasm and hope these ideas first engendered, the commitment to any of them rarely lasted very long. Pelkmans finds that there is an inverse relationship between the tenacity and the effervescence of collective ideas, between their strength to persist and their ability to trigger committed action. Introducing the concept of pulsation, he argues in *Fragile Conviction* that ideational power must be understood in relation to three aspects: the voicing of the idea, its tension with everyday reality, and its reverberation within groups of

---

listeners. The conclusion that the power of conviction is rooted in the instability of sociocultural contexts is a message that has relevance far beyond urban Central Asia.

stars for her service in World War II and was credited for shooting down nine (9) enemy planes. However, this fame was overshadowed by the first 15 minutes July 30, 1945, when she was struck by two (2) torpedoes from Japanese submarine I-58 and sent to the bottom of the Philippine Sea. The sinking of Indianapolis and the loss of 880 crew out of 1,196 --most deaths occurring in the 4-5 day wait for a rescue delayed --is a tragedy in U.S. naval history. This historical reference showcases primary source documents to tell the story of Indianapolis, the history of this tragedy from the U.S. Navy perspective. It recounts the sinking, rescue efforts, follow-up investigations, aftermath and continuing communications efforts. Included are deck logs to better understand the ship location when she sunk and testimony of survivors and participants. A historical study of Chile's twin experiments with cybernetics and socialism, and what they tell us about the relationship of

technology and politics. In Cybernetic Revolutionaries, Eden Medina tells the history of two intersecting utopian visions, one political and one technological. The first was Chile's experiment with peaceful socialist change under Salvador Allende; the second was the simultaneous attempt to build a computer system that would manage Chile's economy. Neither vision was fully realized—Allende's government ended with a violent military coup; the system, known as Project Cybersyn, was never completely implemented—but they hold lessons for

---

today about the relationship between technology and politics. Drawing on extensive archival material and interviews, Medina examines the cybernetic system envisioned by the Chilean government—which was to feature holistic system design, decentralized management, human-computer interaction, a national telex network, near real-time control of the growing industrial sector, and modeling the behavior of dynamic systems. She also describes, and documents with photographs, the network's Star Trek-like operations room, which featured swivel chairs with armrest control panels, a wall of screens displaying data, and flashing red lights to indicate economic emergencies. Studying project Cybersyn today helps us understand not only the technological ambitions of a government in the midst of political change but also the limitations of the Chilean revolution. This history further shows how human attempts to combine the political and the technological with the goal of creating a more just society can open new technological, intellectual, and political possibilities. Technologies, Medina

Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine.

This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any

measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of

---

Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran.	Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night
