No matter where students' lives lead after graduation, one of the most essential tools we can teach them is how to comprehend, analyze, and respond to arguments. Students need to know how writers' and speakers' choices are shaped by elements of the rhetorical situation, including audience, occasion, and purpose. In *Teaching Arguments*, Jennifer Fletcher provides teachers with engaging classroom activities, writing prompts, graphic organizers, and student samples to help students at all levels read, write, listen, speak, and think rhetorically. Jennifer believes that, with appropriate scaffolding and encouragement, all students can learn a rhetorical approach to argument and gain access to rigorous academic content. *Teaching Arguments* opens the door and helps them pay closer attention to the acts of meaning around them, to notice persuasive strategies that might not be apparent at first glance. When we analyze and develop arguments, we have to consider more than just the printed words on the page. We have to evaluate multiple perspectives; the tension between belief and doubt; the interplay of reason, character, and emotion; the dynamics of occasion, audience, and purpose; and how our own identities shape what we read and write. Rhetoric teaches us how to do these things. *Teaching Arguments* will help students learn to move beyond a superficial response to texts so they can analyze and craft sophisticated, persuasive arguments--a major cornerstone for being not just college-and career-ready but ready for the challenges of the world.

A Profile in Communication Macmillan

The rise of the media presidency through radio and television broadcasts has heightened the visibility and importance of presidential speeches in determining the effectiveness and popularity of the President of the United States. Not surprisingly, this development has also witnessed the rise of professional speechwriters to craft the words the chief executive would address to the nation. Yet, as this volume of expert analyses graphically demonstrates, the reliance of individual presidents on their speechwriters has varied with the rhetorical skill of the officeholder himself, his managerial style, and his personal attitude toward public speaking. The individual chapters here (two by former White House speechwriters) give fascinating insight into the process and development of presidential speechwriting from Franklin D. Roosevelt's administration to Ronald Reagan's. Some contributors, such as Charles Griffin writing on Eisenhower and Moya Ball on Johnson, offer case studies of specific speeches to gain insight into those presidents. Other chapters focus on institutional arrangements and personal relationships, rhetorical themes characterizing an administration, or the relationship between words and policies to shed light on presidential speechwriting. The range of presidents covered affords opportunities to examine various factors that make rhetoric successful or not, to study alternative organizational arrangements for speechwriters, and even to consider the evolution of the rhetorical presidency itself. Yet, the volume's single focus on speechwriting and the analytic overviews provided by Martin J. Medhurst not only bring coherence to the work, but also make this book an exemplar of how unity can be achieved from a diversity of approaches. Medhurst's introduction of ten "myths" in the scholarship on presidential speeches and his summary of the enduring issues in the practice of speechwriting pull together the work of individual contributors. At the same time, his introduction and conclusion transcend particular presidents by providing generalizations on the role of speechwriting in the modern White House.

When First Lady Michelle Obama approached the podium at the 2016 Democratic National Convention, nobody could have predicted that her rousing and emotional "When they go low, we go high" speech would go on to become the motto for the political left and an anthem for opponents of oppression worldwide. It was a speech with the kind of emotional pull rarely heard these days, joining a long list of addresses that have made history. But what about Obama's speech made it so great? *When They Go Low, We Go High* explores the most notable speeches in history, analyzing the rhetorical tricks to uncover how the right speech at the right time can profoundly shape the world.

Traveling across continents and centuries, political speechwriter Philip Collins reveals what Thomas Jefferson owes to Cicero and Pericles, who really gave the Gettysburg Address, and what Elizabeth I shares with Winston Churchill. In telling the story of great and sometimes infamous speeches—including those from Lincoln, Woodrow Wilson, JFK, Martin Luther King, Jr., Disraeli, Hitler, Elie Wiesel, Margaret Thatcher, and Barack and Michelle Obama—Collins breathes new life into words you thought you knew well, telling the story of democracy. Whether it's the inaugural addresses of presidents or the revolutionary writings of Castro, Pankhurst, and Mandela, Collins illuminates and contextualizes these moments with sensitivity and humor. *When They Go Low, We Go High* is a strong defense of the power of public speaking to propagate and protect democracy and an urgent reminder that when great men and women speak to us, their words can change the world.

Becoming JFK Harper Collins

"The Montgomery bus boycott of 1955 brought Dr. King, his wife, and their young family into national prominence. Since then the nation and the world have seen the beauty and composure of Coretta Scott King as she assumed her role in the tumult of the Civil Rights Movement, stepped forth boldly and bravely when Dr. King was assassinated, and then set out to speak and act on her own on behalf of civil rights, economic justice, and the King legacy." --BOOK JACKET.

"A collection of encyclopedia-styled essays on 58 leading political, social, and religious speakers, *American Orators of the Twentieth Century* fills an enormous void in the literature on American public address. . . . Each assesses the orator's impact on American life and delineates such aspects of his or her speaking as argumentation, style, persuasive techniques, delivery, and methods of speech preparation. Appended to each essay is a chronology of the orator's major speeches and a list of information sources that includes leading research collections, speech anthologies, critical studies, and biographies. Given the large number of contributors, the entries are remarkably even in coverage and clarity. . . . On the whole, the editors have achieved a sensible balance among mainstream political leaders, religious orators, and spokesmen and spokeswoman for a variety of historical and contemporary causes. If we judge the book on the quality of the essays it contains, rather than on the alternative speakers it might have included, it deserves high marks. Scrupulously edited, superbly produced, and splendidly bound, it will be the standard reference work on its subject for years to come." -- Amazon.com.

The Decision to Go to the Moon "Let the Word Go Forth" The Speeches, Statements, and Writings of John F. Kennedy

Here, from James Tobin, winner of the National Book Critics Circle Award in biography, is the story of the greatest comeback in American political history, a saga long buried in half-truth, distortion, and myth—Franklin Roosevelt's ten-year climb from paralysis to the White House. In 1921, at the age of thirty-nine, Roosevelt was the brightest young star in the Democratic Party. One day he was racing his children around their summer home. Two days later he could not stand up. Hopes of a quick recovery faded fast. "He's through," said allies and enemies alike. Even his family and close friends misjudged their man, as they and the nation would learn in time. With a painstaking reexamination of original documents, James Tobin uncovers the twisted chain of accidents that left FDR paralyzed; he reveals how polio recast Roosevelt's fateful partnership with his wife, Eleanor; and he shows that FDR's true victory was not over paralysis but over the ancient stigma attached to the disabled. Tobin also explodes the conventional wisdom of recent years—that FDR deceived the public about his condition. In fact, Roosevelt and his chief aide, Louis Howe, understood that only by displaying himself as a man who had come back from a knockout punch could FDR erase the perception that had followed him from childhood—that he was a pampered, too smooth pretty boy without the strength to lead the nation. As Tobin persuasively argues, FDR became president less in spite of polio than because of polio. *The Man He Became* affirms that true character emerges only in crisis and that in the shaping of this great American leader character was all.

Modern presidents regularly appeal over the heads of Congress to the people at large to generate support for public policies. *The Rhetorical Presidency* makes the case that this development, born at the outset of the twentieth century, is the product of conscious political choices that fundamentally transformed the presidency and the meaning of American governance. Now with a new foreword by Russell Muirhead and a new afterword by the author, this landmark work probes political pathologies and analyzes the dilemmas of presidential statecraft. Extending a tradition of American political writing that begins with *The Federalist* and continues with Woodrow Wilson's *Congressional Government*, *The Rhetorical Presidency* remains a pivotal work in its field.

An analysis of the week leading up to JFK's inauguration and his famous "ask not what your country can do for you, but what you can do for your country" speech offers insight into how America was divided by war fears, the president's personality, and his strategic efforts to rally American spirit. Reprint.

An Inaugural Poem for the Country Signal

The decision announced by John F. Kennedy on May 25, 1961, initiating the expedition to the moon, is now documented in full for future students of history. To John Logsdon, whose approach is that of a political scientist examining the influence of men and events on the decision-making process, the decision to land a man on the moon "before this decade is out" was wholly political rather than military, although overtones of implied defense were useful in obtaining congressional support. Moreover, he notes it was made without the support of the scientific community, although their previous research efforts were expected partially to offset this deterrent. Although the success of the Russian manned orbit and the fiasco of the Bay of Pigs invasion certainly influenced the timing, in the author's interpretation the Kennedy decision manages to escape the narrow definition of a public relations exhibition. In Kennedy's view, he emphasizes, the security of the country itself was inseparably linked to a position of prestige in world opinion. Nor was he a particular enthusiast of space exploration for its own rewards. As he remarked to one of his advisors, "If you had a scientific spectacular on this earth that would be more useful--say desalting the ocean--or something just as dramatic and convincing as space, then we would do "that." "The thoroughness of this book as a historical record is evident throughout. NASA historical records and government documents not previously released, including several Presidential papers, are used in the analysis, and the author weaves these records together with subtleties of opinion from interviews with NASA officials and such Kennedy advisors as Theodore Sorenson, McGeorge Bundy, David Bell, and Jerome Wiesner. **Rhetorical Comprehension, Critique, and Response** New York : W. How do leading Democratic Party figures strive to communicate with and influence their audience? Why have some proven more successful than others in advancing their ideological arguments? How do orators seek to connect with different audiences in different settings such as the Senate, conventions and through the media? This thoroughly researched and highly readable collection comprehensively evaluates these questions as well as providing an extensive interrogation of the political and intellectual significance of oratory and

rhetoric in the Democratic Party. Using the Aristotelian modes of persuasion ethos, pathos and logos it draws out commonalities and differences in how the rhetoric of Democratic Party politics has shifted since the 1960s. More broadly it evaluates the impact of leading orators upon American politics and argues that effective oratory remains a vital part of American political discourse.

Speeches That Shape the World and Why We Need Them Penguin

In this biography, David Burner explores the controversies, successes and failures the life and presidency of John F. Kennedy, and his influence in shaping the modern American consciousness. Burner's in-depth discussion of John F. Kennedy (1917-1963) as both an individual and a leader allows the reader to examine the changes that took place in the American political and social systems that were reflected in the hopeful days of Kennedy's "Camelot." Paperback, brief, and inexpensive, each of the titles in the Library of American Biography Series focus on a figure whose actions and ideas significantly influenced the course of American history and national life. In addition, each biography relates the life of its subject to the broader themes and developments of the times.

In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped ("poorly wired") to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.
