Corporate failures and accounting scandals have shaken the foundations of investors ' confidence in the transparency, integrity and accountability of corporations and financial markets. There have also been public disquiet about the role of professional auditors and audit firms, who had been associated with these corporate scandals. Written from a independent attitude of statutory auditors in protecting stakeholders ' interest and examines the effectiveness of the existing standards and other legal and regulatory requirements in enforcing statutory auditors ' independent engagement. It then suggests modifications in those regulations. The study has been made through seven chapters in order to address empirically statutory auditors ' independence in protecting stakeholders ' interest. Primary audiences of the book are researchers in finance and control, students, and professionals in the field of accounting and auditing.

Praise for The Financial Numbers Game "So much for the notion 'those who can, do-those who can't, teach.' Mulford and Comiskey function successfully both as college professors and real-world financial mercenaries. These guys know their balance sheets. The Financial Numbers Game should serve as a survival manual for both serious individual investors and industry pros who study and act upon the interpretation of financial statements. This unique blend of battle-

earned scholarship and quality writing is a must-read/must-have reference for serious financial statement analysis."

--Bob Acker, Editor/Publisher, The Acker Letter "Wall Street's unforgiving attention to quarterly earnings presents ever increasing pressure on CFOs to manage earnings and expectations. The Financial Numbers Game provides a clear explanation of the ways in which management can stretch, bend, and break accounting rules to reach the desired bottom line. This arms the serious investor or financial analyst with the healthy skepticism required to drive beyond reported results to a clear understanding of a firm's true performance." --Mark Hurley, Managing Director, Training and Development, Global Corporate and Investment Banking, Bank of America "After reading The

Financial Numbers Game, I feel as though I've taken a master's level course in financial statement analysis. Mulford and Comiskey's latest book should be required reading for anyone who is serious about fundamentally analyzing stocks." --Harry Domash, San Francisco Chronicle investing columnist and investment newsletter publisher

Patterns of Entrepreneurship
Management Springer

In this groundbreaking book, Bill Price and David Jaffe offer a new, game-changing approach, showing how managers are taking the wrong path and are using the wrong metrics to measure customer service. Customer service, they assert, is only needed when a company does something wrong—eliminating the need for service

is the best way to satisfy customers. To be successful, companies need to treat service as a data point of dysfunction and figure what they need to do to eliminate the demand. The Best Service Is No Service outlines these seven principles to deliver the best service that ultimately leads to "no service": Eliminate dumb contacts Create engaging self-service Be proactive Make it easy to contact your company Own the actions across the company Listen and act Deliver great service experiences

The dissertation consists of four essays on the quality of audited financial statements. The first analysis investigates the association between

several regulations of the audit market and earnings characteristics. The second essay differentiates between different drivers of audit quality after an auditor change by comparing the effects of voluntary and mandatory auditor changes. The third study analyses the different strategies of Big4 and non-Big4 auditors in dealing with Level 3 fair values. The fourth part examines banks' valuation behavior concerning Level 3 fair values.
