In this groundbreaking book, Bill Price and David Jaffe offer a new, game-changing approach, showing how managers are taking the wrong path and are using the wrong metrics to measure customer service. Customer service, they assert, is only needed when a company does something wrong—eliminating the need for service is the best way to satisfy customers. To be successful, companies need to treat service as a data point of dysfunction and figure what they need to do to eliminate the demand. The Best Service Is No Service outlines these seven principles to deliver the best service that ultimately leads to "no service": Eliminate dumb contacts Create engaging self-service Be proactive Make it easy to contact your company Own the actions across the company Listen and act Deliver great service experiences

Praise for The Financial Numbers Game "So much for the notion 'those who can, do-those who can't, teach.' Mulford and Comiskey function successfully both as college professors and real-world financial mercenaries. These guys know their balance sheets. The Financial Numbers Game should serve as a survival manual for both serious individual investors and industry pros who study and act upon the interpretation of financial statements. This unique blend of battle-earned scholarship and quality writing is a must-read/must-have reference for serious financial statement analysis." --Bob Acker, Editor/Publisher, The Acker Letter "Wall Street's unforgiving attention to quarterly earnings presents ever increasing pressure on CFOs to manage earnings and expectations. The Financial Numbers Game provides a clear explanation of the ways in which management can stretch, bend, and break accounting rules to reach the desired bottom line. This arms the serious investor or financial analyst with the healthy skepticism required to drive beyond reported results to a clear understanding of a firm's true performance." --Mark Hurley, Managing Director, Training and Development, Global Corporate and Investment Banking, Bank of America "After reading The Financial Numbers Game, I feel as though I've taken a master's level course in financial statement analysis. Mulford and Comiskey's latest book should be required reading for anyone who is serious about fundamentally analyzing stocks." --Harry Domash, San Francisco Chronicle investing columnist and investment newsletter publisher
