Essentials of Operations Management Oxford University Press, USA

This book focuses on the law of commercial contracts as constructed by the U.S. and UK legal systems. Leading scholars from both sides of the Atlantic provide works of original scholarship focusing on current debates and trends from the two dominant common law systems. The chapters approach the subject areas from a variety of

perspectives - doctrinal analysis, law and economic analysis, and social-legal studies, as well as other theoretical perspectives. The book covers the major themes that underlie the key debates relating to commercial contract law: role of consent; normative theories of contract law; contract design and good faith; implied terms and interpretation; policing contract behavior; misrepresentation, breach, and remedies; and the regional and international harmonization of contract law. Contributors provide insights on the many commonalities, but more interestingly, on the key divergences of the United States and United Kingdom's approaches to numerous areas of contract law. Such a comparative analysis provides a basis for future developments and improvements of commercial contract law in both countries, as well as other countries that are members

of the common law systems. At the same time, insights gathered here should also be of interest to scholars and practitioners of the civil law tradition.

In recent years there has been a revival of interest in the philosophical study of contract law. In 1981 Charles Fried claimed that contract law is based on the philosophy of promise and this has generated what is today known as 'the contract and promise debate'. Cutting to the heart of contemporary discussions, this volume brings together leading philosophers, legal theorists, and contract lawyers to debate the philosophical foundations of this area of law. Divided into two parts, the first explores general themes in the contract theory literature, including the philosophy of promising, the nature of contractual

obligation, economic accounts of contract law, and the relationship between contract law and moral values such as personal autonomy and distributive justice. The second part uses these philosophical ideas to make progress in doctrinal debates, relating for example to contract interpretation, unfair terms, good faith, vitiating factors, and remedies. Together, the essays provide a picture of the current state of research in this revitalized area of law, and pave the way for future study and debate.

This book seeks to fill a gap  
in the existing literature by  
describing the formulation,  
interpretation and  
enforcement of the rules on  
consumer contracts in China  
and the EU, and by mapping  
key similarities and  
differences. The study  
addresses selected issues  
regarding consumer contracts:  
sources of law in the two  
jurisdictions are first  
discussed to set the scene.  
Afterwards, one preliminary

issue - how to define the  
concept of a consumer  
contract - and two  
substantive topics - unfair  
terms and withdrawal rights -  
are dealt with. Apart from  
the descriptive analysis, the  
book also provides possible  
explanations for these  
comparative findings, and  
argues that the differences  
in consumer contract rules  
can be primarily attributed  
to a disparity of markets.  
The book offers a valuable  
resource, particularly for  
researchers and practitioners  
in the fields of private law  
and comparative law.
