In 2014, Peirce will have been dead for one hundred years. The book will celebrate this extraordinary, prolific thinker and the relevance of his idea for semiotics, communication, and cognitive studies. More importantly, however, it will provide a major statement of the current status of Peirce's work within semiotics. The volume will be a contribution to both semiotics and Peirce studies.

With 83 additional outline and four-color maps, World Civilizations: The Global Experience, Fifth Edition, Atlas Edition, helps students with geography, one of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think

critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of World Civilizations is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. World Civilizations balances this discussion of independent developments in the world's major civilizations with

comparative analysis of the results of global contact. _____ An adventure story of love, loss, survival and reconciliation . . .

The Handfasted Wife is the story of the Norman Conquest from the perspective of Edith (Elditha) Swanneck, Harold's common-law wife. She is set aside for a political marriage when Harold becomes king in 1066.

Determined to protect her children's destinies and control her economic future, she is taken to William's camp when her estate is sacked on the eve of the Battle of Hastings. She later identifies Harold's body on the battlefield and her youngest son becomes a Norman hostage.

Elditha avoids an arranged marriage with a Breton knight by which her son might or might not be given into his care. She makes her own choice and sets out through strife-torn England to seek help from her sons in Dublin. However, events again overtake her. Harold's mother, Gytha, holds up in her city of Exeter with other aristocratic women, including Elditha's eldest daughter. The girl is at risk, drawing Elditha back to Exeter and resistance. Initially supported by Exeter's burghers the women withstand William's siege.

However, after three horrific weeks they negotiate exile and the removal of their treasure. Elditha takes sanctuary in a convent where eventually she is reunited with her hostage son. This is the story of the internationally acclaimed American woman Margaret Bourke-White, who for over thirty years made photographic history: as the first photographer to see the artistic and storytelling possibilities in American industry, as the first to write social criticism with a lens, and as the most distinguished and venturesome foreign correspondent-with-a-camera to report wars, politics and social and political revolution on three continents. In this poignant autobiography, Bourke-White details her fight against

Parkinson's disease, and recounts tales of her struggles to master her art and craft, of photographing Stalin, Gandhi and many other notables, of being torpedoed off North Africa while reporting World War II, of flying combat missions, of photographing the dread murder camps of Nazi Germany, of touring Tobacco Road to produce the book *You Have Seen Their Faces* with Erskine Caldwell (whom she later married), of adventures—and wonderful picture-taking—in the mines of South Africa, in the frozen North, in war-torn Korea. Illustrated throughout with over 70 of Margaret Bourke-White's fine photographs, this is the great life story of a great American, greatly yet modestly told.

Life on the Mississippi is a memoir by Mark Twain detailing his days as a steamboat pilot on the Mississippi River before and after the American Civil War. The book begins with

a brief history of the river. It continues with anecdotes of Twain's training as a steamboat pilot, as the 'cub' of an experienced pilot. He describes, with great affection, the science of navigating the ever-changing Mississippi River. In the second half, the book describes Twain's return, many years later, to travel on a steamboat from St. Louis to New Orleans. He describes the competition from railroads, the new, large cities, and his observations on greed, gullibility, tragedy, and bad architecture. He also tells some stories that are most likely tall tales.

Simultaneously published in 1883 in the U.S. and in England, it is said to be the first book composed on a typewriter.

It contains abridged stories of Greek mythology, including the extant Greek plays, and considers portions of the works of the great writers, including Aeschylus, Euripides, Hesiod, Homer, Plato, and Sophocles. It opens a comprehensive window into the lives of these great ancient people.

Excerpt from *History of Europe*

Rome and Athens, so far from being weakened, were immeasurably strengthened by their colonies those flourishing settlements which surrounded the Mediterranean Sea were the brilliant girdle which, as much as the arms of the Legions, contributed to the strength of the Empire and England would never have emerged victorious from her immortal contest for European freedom, if she had not found in her colonial trade the means of maintaining the contest, when shut out from the markets of the Continental states. If it were permitted to follow fanciful analogies between the body politic and the human frame, it would be safer to say that the prolific parent of many colonies is like the happy mother of a numerous offspring, who exhibits, even in mature years, no symptoms of decline, and preserves the freshness and charms of youth for a much longer period than she who has never undergone the healthful labours of parturition. Portrait of Myself Amer Society of Civil Engineers

In the summer of 1893, at the Columbian Exposition in Chicago, an engineering marvel was unveiled and immediately captured the world's attention. It was a towering, web-like giant wheel, standing upright and rotating high above the city. Several stories taller than any existing American building, the Ferris Wheel carried adventure-seeking passengers to the dizzying height of 264 feet and provided panoramic views never before possible. George W. G. Ferris Jr. and his wheel helped usher America eager to identify itself with ingenuity, entrepreneurialism, and innovation into the 20th century.

Yet the very wheel that came to define George Ferris in the end consumed him, leaving him ruined. This book is the first full-length biography of George Ferris. He was a civil engineer, an inventor, and a pioneer for his development of structural steel in bridge building. *Circles in the Sky* chronicles the life of the man responsible for creating, designing, and building the Ferris Wheel, the only structure of its time to rival the Eiffel Tower. It is, at the same time, the story of the Ferris clan, one of the nation's oldest and most fascinating families. The London Eye, erected in 1999 to welcome the new millennium, the Star of Nanchang, and most recently, the Singapore Flyer, have revived our love affair with Ferris wheels. *Circles in the Sky* will enchant anyone interested in engineering marvels, history, and the Ferris wheel, which reminds us that America was built by dreamers and innovators such as George W. G. Ferris Jr. About the Author Richard G. Weingardt, P.E., Dist.M.ASCE, is a practicing structural engineer with nearly 50

years of experience. He is also a sought-after motivational speaker and an accomplished author of books and articles, including *Engineering Legends: Great American Civil Engineers* (ASCE Press, 2005) and regular columns in *Structural Engineer* and *ASCE's Journal of Leadership and Management in Engineering*.
