Honest to Goodness proposes a new Christian presence that is free of dogmatism, exclusivism, and biblicism. It charts a way back to the spiritual and ethical revolution begun by Jesus of Nazareth, one that can make a vital difference to needless evils such as bigotry, environmental destruction, poverty, and violence. The book reveals the author's experience of living under, against, and after apartheid, insisting that a faith that does not confront this world's evils is no faith at all, but a dangerous betrayal of all that is good, beautiful, and true. Honest to Goodness unflinchingly identifies the grave moral shortcomings that are embedded in traditional Christian beliefs and practices, and proposes ways of transforming them into harmony with the divine goodness that the author discerns everywhere. Embracing a world of religious diversity, science, and creative philosophy, the book describes a new way of experiencing and expressing the divine. It defends faith by moving beyond both theism and atheism.

Interdisciplinary perspectives on cultural evolution that reject meme theory in favor of a complex understanding of dynamic change over time How do cultures change? In recent decades, the concept of the meme, posited as a basic unit of culture analogous to the gene, has been central to debates about cultural transformation. Despite the appeal of meme theory, its simplification of complex interactions and other inadequacies as an explanatory framework raise more questions about cultural evolution than it answers. In *Beyond the Meme*, William C. Wimsatt and Alan C. Love assemble interdisciplinary perspectives on cultural evolution, providing a nuanced understanding of it as a process in which dynamic structures interact on different scales of size and time. By focusing on the full range of evolutionary processes across distinct contexts, from rice farming to scientific reasoning, this volume demonstrates how a thick understanding of change in culture emerges from multiple disciplinary vantage points, each of which is required to understand cultural evolution in all its complexity. The editors provide an extensive introductory essay to contextualize the volume, and Wimsatt contributes a separate chapter that systematically organizes the conceptual geography of cultural processes and phenomena. Any adequate account of the transmission, elaboration, and evolution of culture must, this volume argues, recognize the central roles that cognitive and social development play in cultural change and the complex interplay of technological, organizational, and institutional structures needed to enable and coordinate these processes. Filipe Carreira da Silva addresses the basic questions 'How should we read Mead?' and 'Why should we read Mead today?' by showing that the history of ideas and theory-building are closely-related endeavors. Following a contextualist approach in exploring the meaning of Mead's writings, Carreira da Silva reads the entire corpus of Mead's published and unpublished writings in light of the context in which they were originally produced, from concrete events like the American involvement in World War I to more general debates like that of the nature of modernity. Mead and Modernity attests to the relevance of Mead's ideas by assessing the relative merits of his responses to three fundamental modern problematics: science, selfhood, and democratic politics. The outcome is an innovative intellectual portrait of Mead as a seminal thinker whose contributions extend beyond his well-known social theory of the self and include important insights into the philosophy of science and radical democratic theory.

Ten-year Supplement, 1956-1965 Kluwer Law International B.V.

This publication is the most comprehensive international book on arbitration in Argentina. It provides a complete description and analysis of the historical and contemporary structure of arbitration law and practice in the country, which is based on the UNCITRAL Model Law. Its chapters are authored by many of the most regarded Argentine authorities, many of whom are responsible for drafting Argentina's current arbitration regulation. Throughout its thirty-one chapters, the book covers an ample number of topics in commercial and investment arbitration, and an exhaustive analysis of arbitration in different specific fields (energy, sports, consumers, among others). Some of the topics addressed in this book include the following: regulatory framework of arbitration in Argentina; arbitration agreements; arbitral proceedings and the applicable law; issues of arbitrability; interim measures; costs and financing of arbitrations; validity, recognition and enforcement of awards; arbitration and the MERCOSUR. This publication also includes some particular studies, for example those related to the tensions between investment arbitration and human rights, as well as the relationship between the country and the ICC, and the PCA. Although mainly focused in Argentina, the discussions contained in several contributions exceed such geographical boundaries. Given that the law and practice of arbitration in Argentina has seen remarkable changes in recent decades, this book is an essential tool for arbitrators, judges, in-house counsels, global law firms, large- and medium-sized companies doing transnational business, interested academics, and international arbitration centres. Because this publication draws from the teachings and experience of leading academics and practitioners, arbitration specialists will find in it all the guidance needed to identify and assess the different theoretical and practical legal avenues available when working on arbitrations with a seat in Argentina or with an Argentine element.

Twenty Introductory Lectures Houghton Mifflin Harcourt

The Space that Separates: A Realist Theory of Art radically challenges our assumptions about what art is, what art does, who is doing it, and why it matters. Rejecting the modernist and market-driven misconception that art is only what artists do, Wilson instead presents a realist case for living artfully. Art is defined as the skilled practice of giving shareable form to our experiences of being-in-relation with the real; that is to say, the causally generative domain of the world that extends beyond our direct observation, comprising relations, structures, mechanisms, possibilities, powers, processes, systems, forces, values, ways of being. In communicating such aesthetic experience we behold life's betweenness – "the space that separates", so coming to know ourselves as connected. Providing the first dedicated and comprehensive account of art and aesthetics from a critical realist perspective – Aesthetic Critical

Realism (ACR), Wilson argues for a profound paradigm shift in how we understand and care for culture in terms of our system(s) of value recognition. Fortunately, we have just the right tool to help us achieve this transformation – and it's called art. Offering novel explanatory accounts of art, aesthetic experience, value, play, culture, creativity, artistic truth and beauty, this book will appeal to a wide audience of students and scholars of art, aesthetics, human development, philosophy and critical realism, as well as cultural practitioners and policy-makers.

"Anyone who wants to understand the world we live in now should read this book." —Lawrence Wright To eliminate the scourge of terrorism, we must first know who the enemy actually is, and what his motivations are. In *Anatomy of Terror*, former FBI special agent and New York Times best-selling author Ali Soufan dissects Osama bin Laden's brand of jihadi terrorism and its major offshoots, revealing how these organizations were formed, how they operate, their strengths, and—crucially—their weaknesses. This riveting account examines the new Islamic radicalism through the stories of its flag-bearers, including a U.S. Air Force colonel who once served Saddam Hussein, a provincial bookworm who declared himself caliph of all Muslims, and bin Laden's own beloved son Hamza, a prime candidate to lead the organization his late father founded.

Anatomy of Terror lays bare the psychology and inner workings of al-Qaeda, the Islamic State, and their spawn, and shows how the spread of terror can be stopped. Winner of the Airey Neave Memorial Book Prize

Understanding Political Violence introduces political violence in the context of sociological and criminological debates. The author distinguishes between political violence from below, for example collective violence, insurgency, armed struggle and terrorism; and political violence from above, which includes indiscriminate repression, institutional and state violence, torture and war. Vincenzo Ruggiero discusses and critiques the contribution of criminological theory to understanding political violence. He draws on stimulating case studies to illustrate the theory, including interviews with former members of the Red Army Faction in Germany and the Brigade Rosse in Italy. The concluding chapter examines the recent development of a criminology of war and calls for a general ceasefire and the criminalisation of war, the most extreme form of institutional violence. This is essential reading for students and researchers in criminology, political studies, sociology, and war and conflict studies. The Athenaeum CRC Press

George Herbert Mead is widely considered one of the most influential American philosophers of the twentieth century, and his work remains vibrant and relevant to many areas of scholarly inquiry today. The *Timeliness of George Herbert Mead* brings together a range of scholars who provide detailed analyses of Mead's importance to innovative fields of scholarship, including cognitive science, environmental studies, democratic epistemology, and social ethics, non-teleological historiography, and the history of the natural and social sciences. Edited by well-respected Mead scholars Hans Joas and Daniel R. Huebner, the volume as a whole makes a coherent statement that places Mead in dialogue with current research, pushing these domains of scholarship forward while also revitalizing the growing literature on an author who has an ongoing and major influence on sociology, psychology, and philosophy.

This volume brings together some of the biggest names in the field of

sociology to celebrate the work of Pitirim A. Sorokin, professor and founder of the department of sociology at Harvard University. Sorokin, a past president of the American Sociological Association, was a pioneer in many fields of research, including sociological theory, social philosophy, methodology, and sociology of science, law, art, and knowledge. Edward A. Tiryakian's updated introduction examines major factors, inside and outside sociology, that have led to new appreciation of Sorokin's contributions and scholarship, and demonstrates their continued relevance. This new edition also includes an updated bibliography of works by and about Sorokin. The volume includes Arthur K. Davis, who describes Sorokin's importance as a teacher in the Socratic tradition. Talcott Parsons examines internal differentiation in Christianity in its historical Western development. Thomas O'Dea deals with the institutionalization of religious values. Walter Firey examines how actors relate their conception of a distant future to their present behavior. Florence Kluckhohn focuses upon the problem of cultural variations within a social system. Robert K. Merton and Elinor Barber examine the sociological aspect of ambivalence. Bernard Barber considers the American business's efforts to institutionalize professionalism. Other contributors include Charles P. Loomis, Wilbert E. Moore, Georges Gurvitch, Marion J. Levy, Jr., Nicholas S. Timasheff, Carle Zimmerman, and Logan Wilson. This volume is an essential collection of essays concerning the work of one of the most prominent thinkers in twentieth-century sociology.

First published in 1999, this volume features 13 contributors with expertise in social science and environmental research who have brought together comparative 12 articles which study the connection between humanity and nature, focusing on comparisons between the Nordic countries: Denmark, Finland, Norway and Sweden. They are among the most homogeneous and hence most comparable societies in Europe. The articles reflect the need for environmental and political change recognised by social scientists and political scientists across the Nordic countries, with an emphasis on ecological modernisation. They first consider conceptions of the environment, before comparing both between and within these countries. The traditions and institutions presented in the volume reflect the comprehensiveness of the approaches used within the field in the Nordic countries.

This major study reassesses the work of the American pragmatist George Herbert Mead (1863-1931), which had a significant impact in fields ranging from metaphysics and ethics to sociology and social psychology. The work of American pragmatist George Herbert Mead (1863-1931) had a strong influence in fields ranging from metaphysics and ethics to sociology and social psychology. In this book, Hans Joas interweaves Mead's political and intellectual biography with the development of his theories. The key concept of the study is "practical intersubjectivity," a term Joas introduces to characterize the link implicit in Mead's work between a theory of intersubjectivity and a theory of praxis. Throughout the book, Joas stresses the practical, social, and political nature of Mead's work. Besides comparing Mead to the other American pragmatists, Joas discusses the relation between Mead's thought and that of such Europeans as Habermas, Apel, Husserl, Merleau-Ponty, and Piaget. Joas's revisionist portrait of Mead as a socially engaged intellectual, with its emphasis on his relevance for contemporary philosophy and social science, has been a key factor in the revival of interest in Mead. The author's new preface includes an update on pragmatism studies in general and on Mead studies in particular.

Essays in Honor of Pitirim A. Sorokin Routledge

"Disenchantment" is a key term in the self-understanding of modernity. But what exactly do we mean when we use this concept? What was its original meaning when Max Weber introduced it? And can the conventional meaning or Max Weber's view really be defended, given the present state of knowledge about the history of religion? This book is an attempt to divest this concept of its enduring enchantment. The first chapters of the book deal with the three empirical disciplines history, psychology and sociology of religion to develop an understanding of religion that then lays the groundwork for what is presented in chapter 4, namely the most thorough study of Weber's views on disenchantment that has ever been undertaken. It turns out that Weber's use was highly ambiguous and that his grand narrative leading from the prophets of ancient Judaism to the crisis of meaning on the eve of the First World War collapses when we recognize this ambiguity. This makes it possible to construct an alternative that takes into account the dynamics of ever new sacralizations, their normative evaluation in the light of the values of a universalist morality and the dangers of the misuse of religion in connection with the formation of power. This book constitutes a challenge - for believers and non-believers alike"--

Social theory is the theoretical core of the social sciences, clearly distinguishable from political theory and cultural analysis. This book offers a unique overview of the development of social theory from the end of the Second World War in 1945 to the present day. Spanning the literature in English, French and German, it provides an excellent background to the most important social theorists and theories in contemporary sociological thought, with crisp summaries of the main books, arguments and controversies. It also deals with newly emerging schools from rational choice to symbolic interactionism, with new ambitious approaches (Habermas, Luhmann, Giddens, Bourdieu), structuralism and antistructuralism, critical revisions of modernization theory, feminism and neopragmatism. Written by two of the world's leading sociologists and based on their extensive academic teaching, this unrivalled work is ideal both for students in the social sciences and humanities and for anyone interested in contemporary theoretical debates.
