Solving the problem of inservice maintenance of Air Force electro-mechanical equipments requires determining whether moderate-ability recruits can be trained in a relatively short time to do effective work on the job . This training need not be such as to make the mechanics attractive to industry. The study reported was an investigation of a specific and limited example of this large problem. An

outline of a training program for B-47 simulator, personnel of the Strategic Air Command was to be developed. The principles and techniques followed were to be described for general use in the development of similar courses. These techniques are expected to be of value in predicting job and training characteristics for other electronic maintenance personnel, particularly those engaged in simulator maintenance.

Reclassification, Hearings Before the Subcommittee on Employee Benefits 92-2, April 12, 25, 1972 Infobase Publishing Industrial Machinery Repair provides a practical reference for practicing plant

engineers, maintenance supervisors, physical plant supervisors and mechanical maintenance technicians. It focuses on the skills needed to select, install and maintain electro-mechanical equipment in a typical industrial plant or facility. The authors focuses on "Best Maintenance Repair Practices" necessary for maintenance personnel to keep equipment operating at peak reliability and companies functioning more profitably through reduced maintenance costs and increased productivity and capacity. A number of surveys conducted in industries throughout the United States have found that 70% of equipment failures are self-induced. If the principles and techniques in this book are followed, it will result in a serious reduction

in "self induced failures". In the pocketbook format, this reference material can be directly used on the plant floor to aid in effectively performing day-to-day duties. Data is presented in a concise, easily understandable format to facilitate use in the adverse conditions associated with the plant floor. Each subject is reduced to it simplest terms so that it will be suitable for the broadest range of users. Since this book is not specific to any one type of industrial plant and is useful in any type of facility. The new standard reference book for industrial and mechanical trades Accessible pocketbook format facilitates on-the-job use Suitable for all types of plant facilities Post Office Jobs Occupational Outlook Handbook Improved Hawk

Business Skills for Engineers and Technologists

The scope of Business Skills for Engineers and Technologists is wider than many traditional business texts, including hot topics such as e-commerce, business ethics and law, as well as fully up-to-date coverage of management issues and finance. The interactive style of the book is ideally suited for the study of business and management topics. Rather than focussing solely on management theory, the subjects are explored within real-world engineering contexts through numerous case studies and

activities, which bring the content to life and create a highly accessible text for the student reader. The IIE Textbook Series from Butterworth-Heinemann Student-focused textbooks with numerous examples, activities, problems and knowledge-check questions Designed for a wide range of undergraduate courses Real-world engineering examples at the heart of each book Core texts suitable for students with no previous background studying engineering "I am very proud to be able to introduce this series as the fruition of a joint publishing venture between Butterworth-Heinemann and the Institution of Incorporated Engineers. Mechanical Engineering Systems is one of the first three titles in a series of core texts designed to cover the essential modules of a broad cross-section of undergraduate programmes in engineering and technology. These books are designed with today's students firmly in mind, and real-world engineering contexts to the fore - students who are increasingly opting for the growing number of courses that provide the foundation for Incorporated Engineer registration." --Peter F Wason BSc(Eng) CEng FIEE FIIE FIMechE FIMgt.
