The Hay Guide Chart itself comprises a point system, so that after job evaluation in terms of factors, dimensions and gradation, job scores can simply be read from the chart. The point system uses geometric progression and is not linear. This preserves the integrity of the system at all ends of the grading spectrum.

Job evaluation is a means of establishing relativities between jobs. A full grading structure can then be developed that recognises the various levels of skill that jobs require. The HAY system operates by providing a number of " job units " - the score- for the job, which is then matched against the grading structure to determine the grade.
